USE STAKING TO GENERATE PASSIVE INCOME!

The whole world on one crypto platform

● VISION

Cryptocurrency, like any monetary system, is based on trust and the ability of money to perform three main functions - a means of payment, exchange and accumulation.

At the same time, cryptocurrency is the next stage in the development of monetary systems, based on the use of modern technologies, which creates new opportunities for businesses, states and ordinary people.

We, a team of professionals in the field of development, trading and project management, believe that cryptocurrency is the future, and we created the Ciclex project - a unique digital platform that includes a cryptocurrency exchange, a wallet for safe storage of cryptocurrencies and a financial instrument that allows you to invest in a high-yield staking pool.

● How we earn money on crypto trading

Trading on crypto exchanges with the help of crypto robots takes place under the constant control of experienced traders.

The Ciclex company's developers have been creating robots for trading cryptocurrencies on exchanges since 2016.

The team of traders has 15 years of experience in trading stocks and currencies on the stock exchanges. Since 2018, Ciclex traders have been trading on crypto exchanges.

- **What currencies can
be used to multiply assets?**

Clients' preferences from October to **December 2020**.

Users for deposits in the stacking pool chose the following currencies:

USDT

BTC

ETH

LTC

● Stabilization pool

The Ciclex company's platform has its own stabilization pool, which ensures the security of trading and staking. His account receives at least 25% of the company's income.

The goal of creating a stabilization pool is to cover negative returns when trading. However, during the entire existence of this fund, its funds have not been used once!

- **How to start earning together with Ciclex?**

Get a Ciclex wallet

This procedure will take no more than one minute.

Top up your wallet

Top up your balance with the equivalent of 100 USD in BTC, ETH, LTC, BTC, USD and you will have the opportunity to invest in a staking pool.

Transfer the funds to the staking pool

Transfer the cryptocurrency from the wallet to the staking pool.

Get a profit

Follow the process in your personal account and get information about the profitability on a daily basis.

● It is very easy to invest in the staking pool!

Top up the balance

At the moment, the
deposit is available:

BITCOIN

ETHEREUM

USDT
(ERC20)

BITCOIN
(CASH)

LITECOIN

OMG

LINK

The minimum deposit amount is 10 USDT

Make a deposit to the staking pool

- The minimum amount of investment in the staking pool is the equivalent of 100 USDT (at the exchange rate at the time of creation)
- There is no upper limit for investment
- When transferring cryptocurrency to a staking pool, a one-time service fee of 10% is charged.

● How the profit is calculated?

- Within a day after investing in the staking pool, income begins to accrue
- Payments are accrued every day and are credited to the profit balance
- When the automatic reinvestment function is enabled, the profit is added to the investment body once every 10 days
- From the profit balance, funds can be transferred to the main balance every 10 days, after which they can be withdrawn or invested again.

Withdrawals from the main balance to external wallets are available at any time and are processed in the following order:

- to 5000 USDT – to 3 working days;
- from 5000 to 10 000 USDT – to 10 working days;
- from 10 000 to 50 000 USDT – to 21 working days;
- more than 50 000 USDT – to 31 working days.

*To withdraw amounts over 10,000 USDT, you need to verify your account.
This is necessary to ensure the security of your invested funds.

● How to withdraw funds from the staking pool?

Withdrawal of funds from the staking pool is available at any time, but in the **first 6 months**, a penalty is imposed for early withdrawal:

30% — in first 3 months;
20% — in the following 2 months;
10% — in 6th month.

The term of multiplication of your funds in the staking pool is **365 days**.

After this period, you can either invest for another year, or withdraw funds to your wallet.

Withdrawal of cryptocurrency from the staking pool takes:

- amount up to 2000 USDT – during 3 working days;
- 2000-10 000 USDT – during 5 working days;
- 10 000-50 000 USDT – during 10 working days;
- more than 50 000 USDT – during 21 working days.

*To withdraw amounts over 10,000 USDT, you need to verify your account.
