

SCORPIO

Passive Income tool

**Passive Income
tool from VC
professionals**

We started our journey in 2018 with an international partnership of US and Hong Kong founders, our main business is HK stocks, US stock trading, short-term quantitative funds, digital asset funds, blockchain product development, supernode operations, e-commerce, cultural communications, real estate, real economy projects. During our work in venture capital we have invested in 17 companies, some of which were sold to major market players.

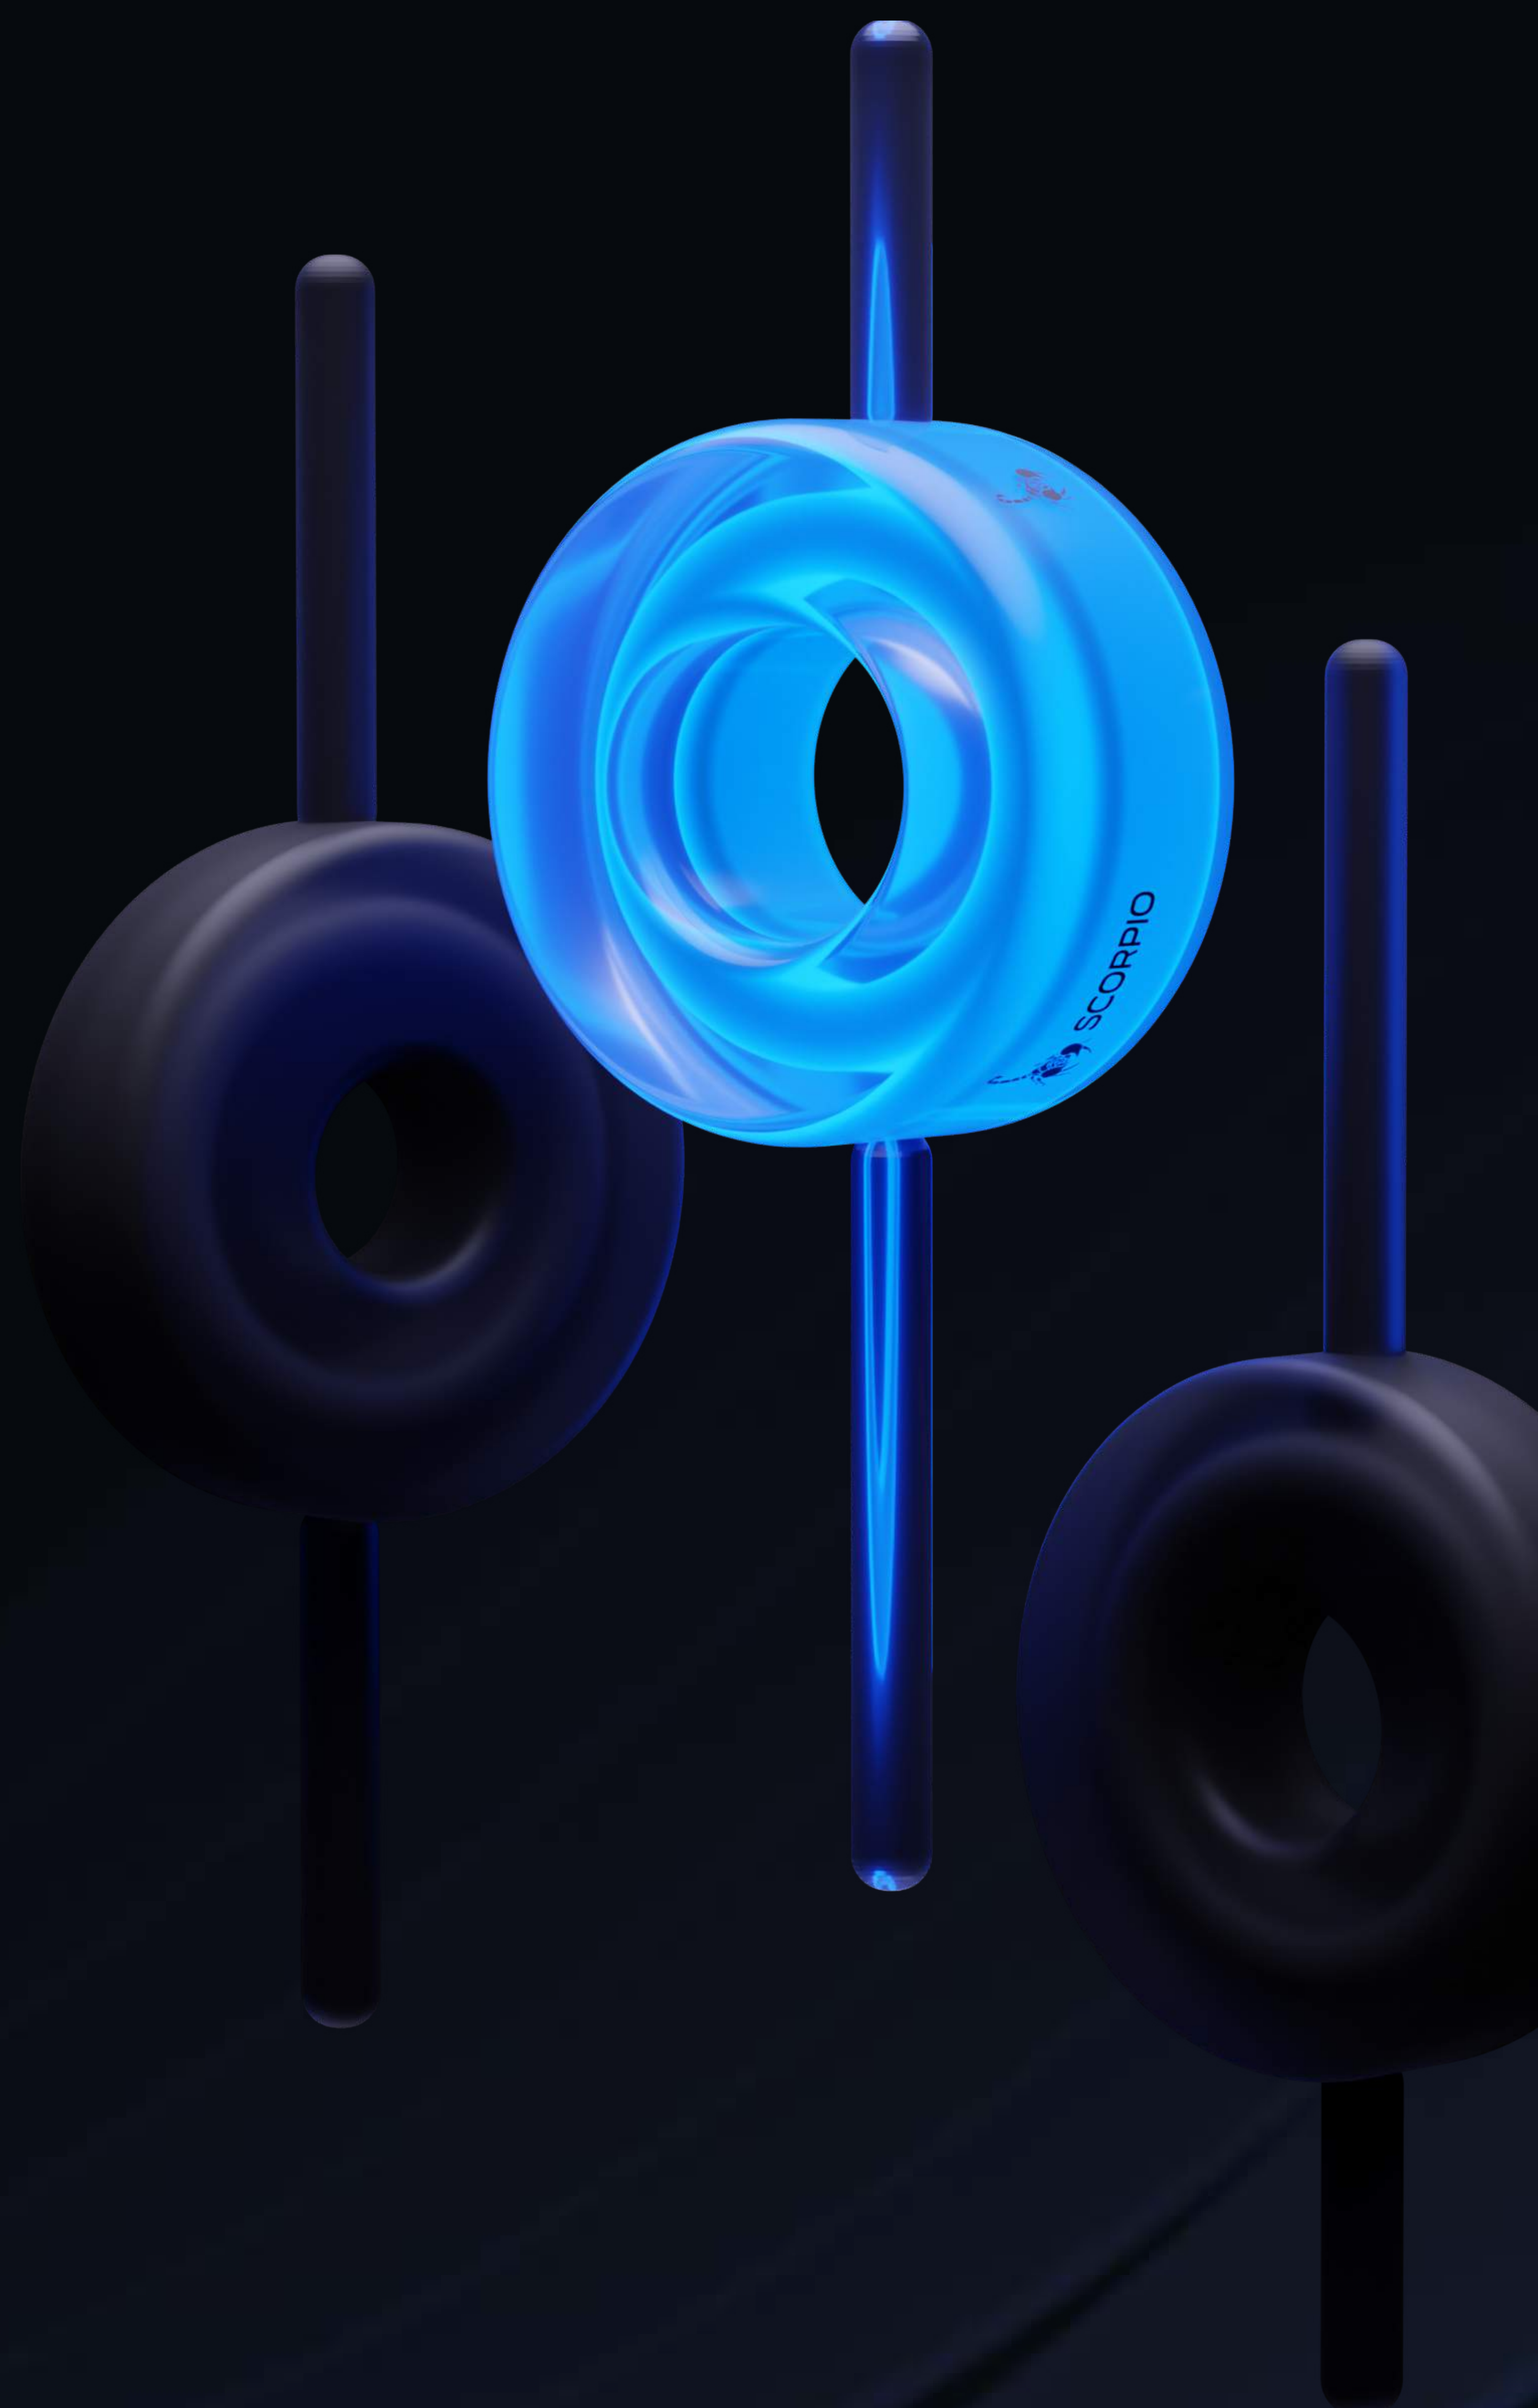

FINANCIAL INVESTMENT

**We use innovative methods to generate
capitalize on the stock markets**

The experience of the team in Internet technology has been exerted in the financial market.

In the A-share, Hong Kong stocks, and US stock markets, via AI and big data technology, a series of strategic plans, such as quantification, macro-strategy trading, and the issuance of private equity funds, have been established.

Maximize the benefits for customers based on safety risk control at the first place

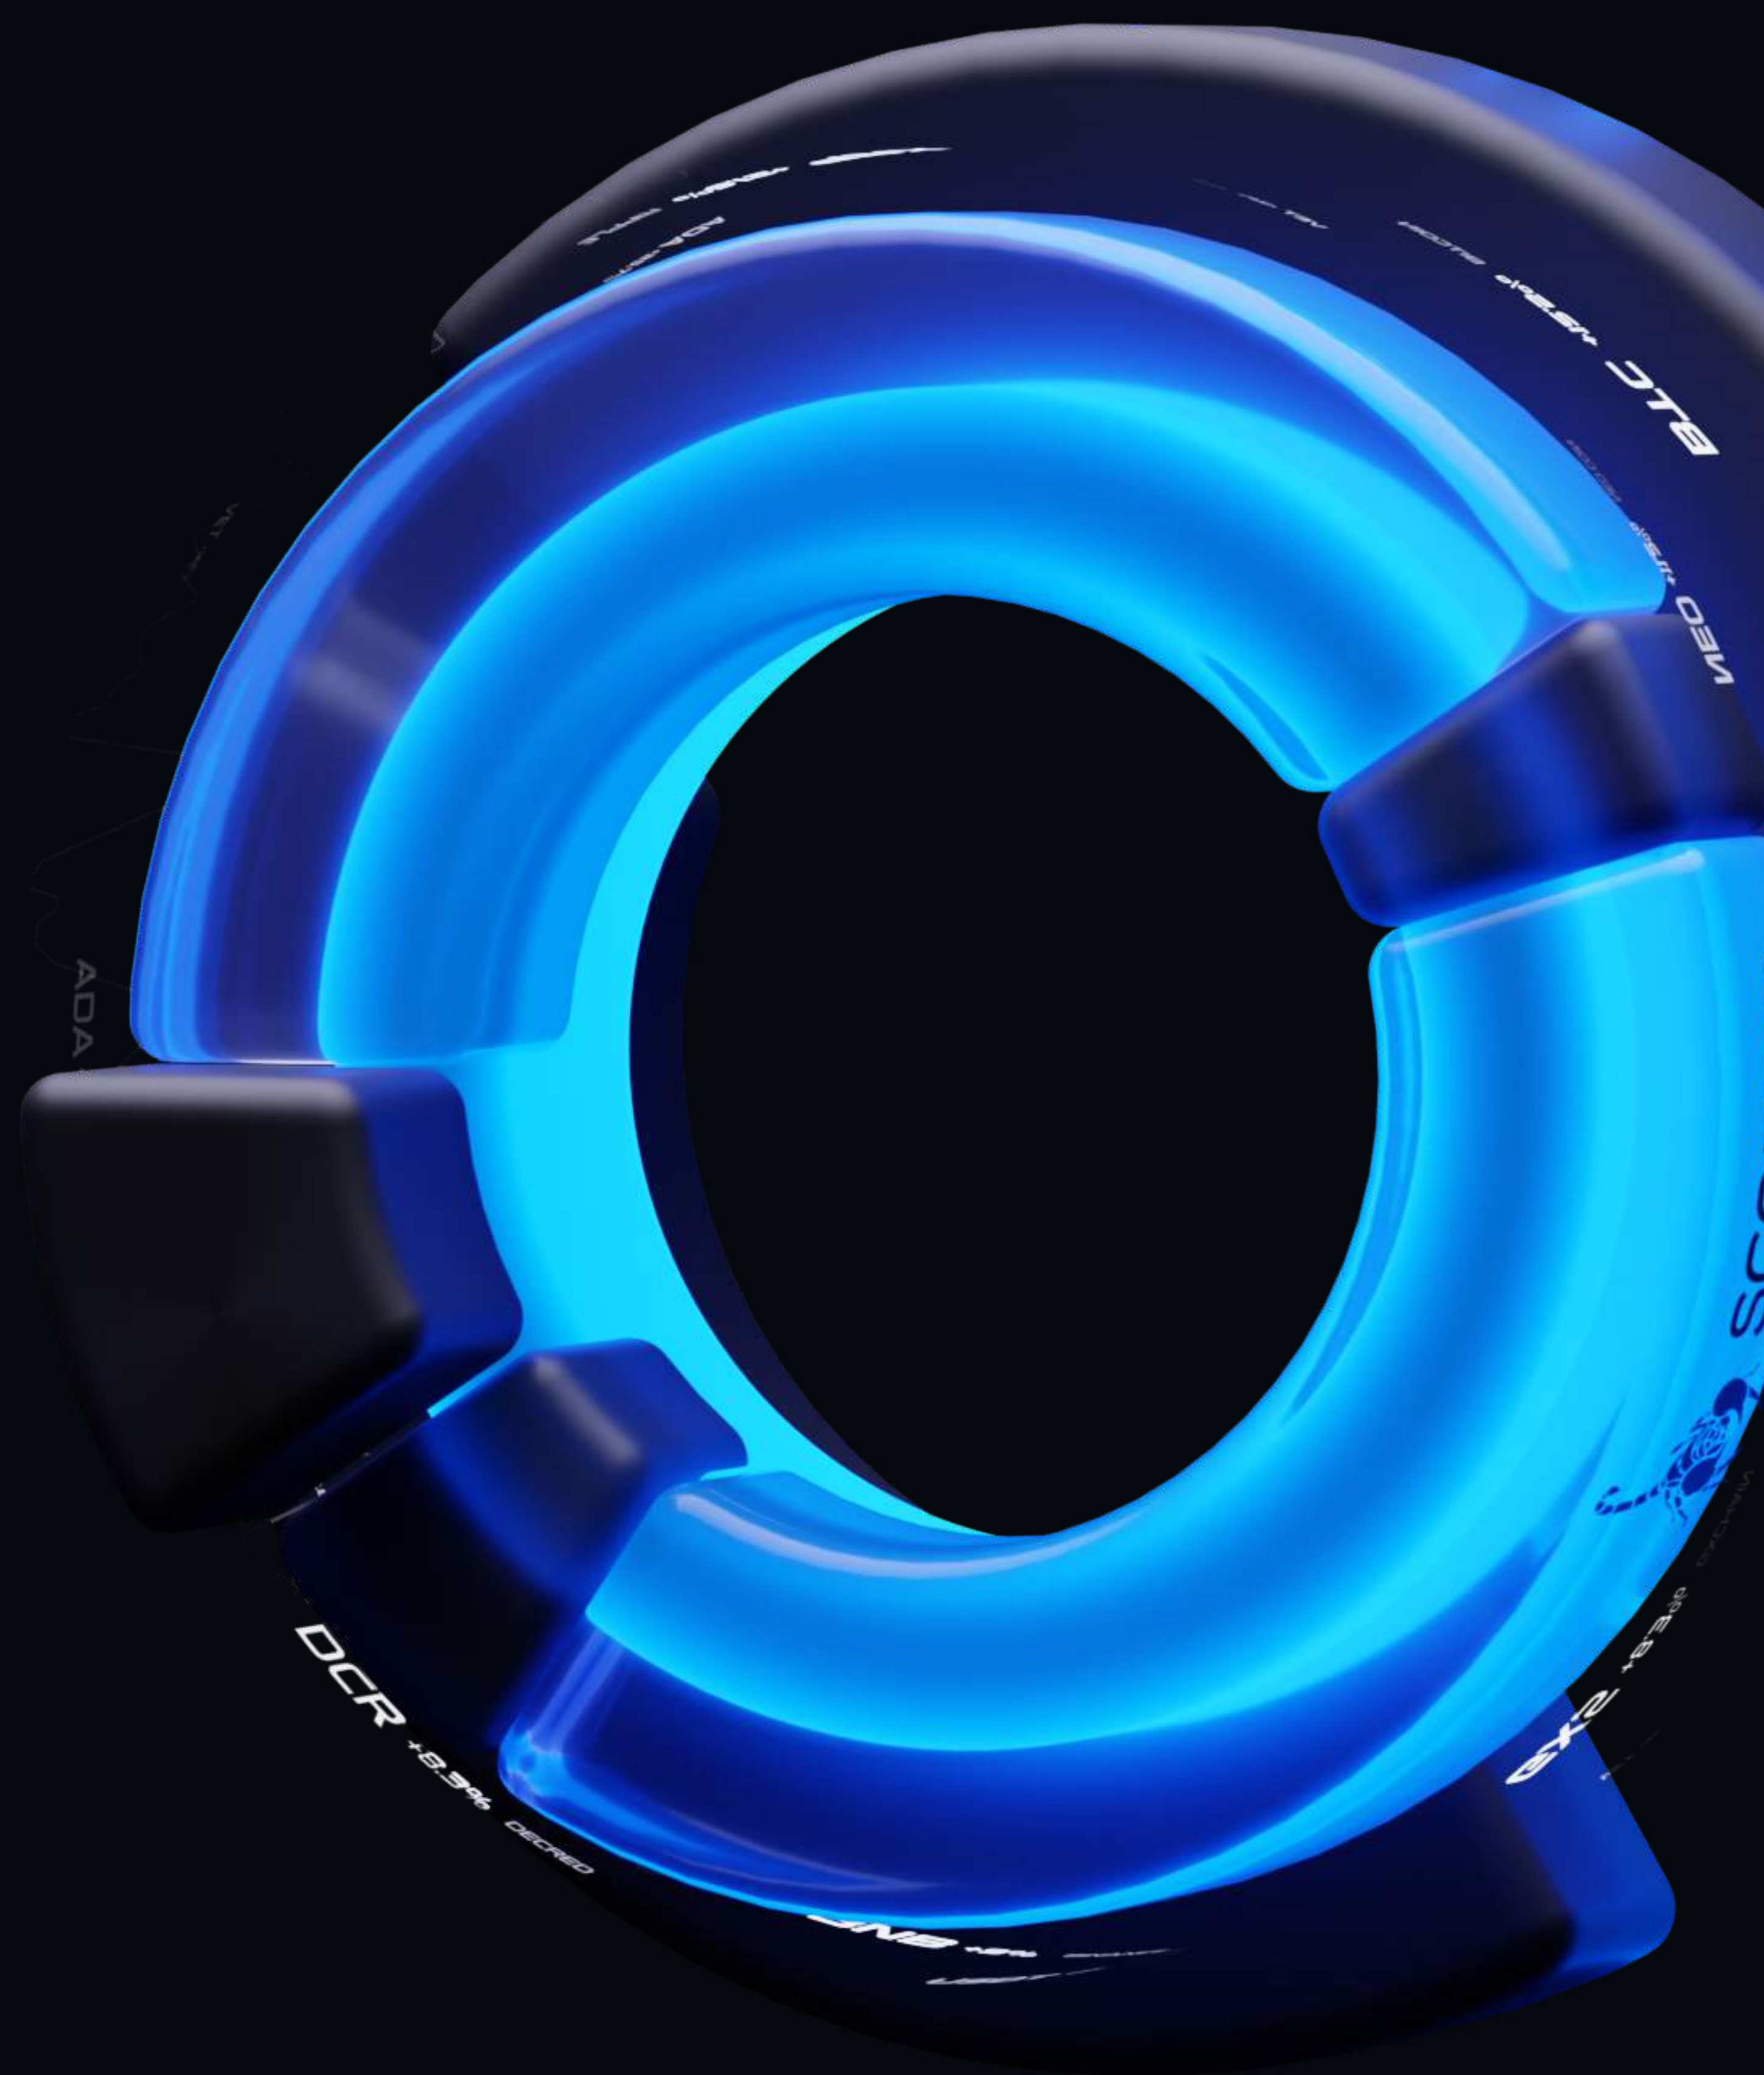

VENTURE CAPITAL

**We invest in promising startups
worldwide**

Years of experience in the Internet and e-commerce industry have enabled us to better understand the journey of entrepreneurship. Since 2018, we have gradually expanded the foreign investment to develop the Venture capital investment in the field of Internet and e-commerce, mainly based on our own funds and partly customer funds

SINCE 2018

BLOCKCHAIN INVESTMENT

We are digital venture capital professionals

We carry out digital asset-winding on some assets or potential venture projects, and solve financing difficulties or industry resource problems for SMEs, increase liquidity, and accelerate the development of the project. Meanwhile, the technology development of blockchain digital assets, quantification, private placement, distribution, trading, and operating are at the service

MAJOR PARTNERS

We are excited to partner with cutting-edge startups in the crypto sphere

Active

Ledgity

Ledgity is the first crypto-asset platform to meet the needs of both investors and financial advisors. Its solution enables customers to diversify and boost their savings through digital assets, while visualizing, steering and optimally managing their wealth, alone or accompanied by an expert.

Active

Interlock

interlock

Interlock is decentralized security incentivized for everyone. Interlock is building blockchain-based security products for individuals and enterprises. Using blockchain technology and artificial intelligence (AI), the company harnesses the power of the crowd to share critical threat intelligence between consumers and businesses, resulting in a safer Internet for all.

Active

Nabox

Nabox is a decentralized wallet designed to send and receive tokens. The company offers a browser-based wallet for cross-chain exchange and supports multiple blockchain networks, allowing users to transfer assets to different networks and participate in the applications of each.

MANAGEMENT

Scorpio was founded on the shared ideology that a large company should not be managed in a one-man operation. Division of responsibilities according to skills is the key to labor efficiency

CEO

Willard Chapman

As befits a manager of the highest caliber Willard Chapman is a far sighted strategist leading the company to new achievements

CFO

Evan Bradshaw

Proper financial flow allocation is half of a company's success and Evan Bradshaw has successfully led Scorpio's financial and reporting activities

CTO

Xu Weikang

Xu Weikang is a computer science graduate from Hong Kong University who is in charge of Scorpio's technical operations

Scorpio Dashboard

Scorpio VC

USER DASHBOARD

Make transactions, invest and manage your account through the convenient functionality of Scorpio VC personal cabinet.

In the dashboard you can see brief information about yourself, your investments and the state of your total and individual cryptocurrency balances.

OPERATIONS

Top up

The site offers the possibility to deposit in 5 cryptocurrencies: BTC, ETH, USDT, BNB, TRX. The process of funding is very simple - you just need to choose the currency and follow the instructions. As soon as the transaction is confirmed in the blockchain network, the funds will be automatically added to your balance.

Transfer

You can make internal transfers to other users. To do this, you need to select the currency, specify the amount and recipient id. This transaction requires some time for processing, which takes on average 5-10 minutes during working hours.

Withdraw

Withdraw your earnings through the withdrawal functionality. To perform the operation, you need to select the currency, enter the amount and the correct wallet address. Please note that withdrawal is available only on Monday and may take different processing time depending on the queue.

Swap

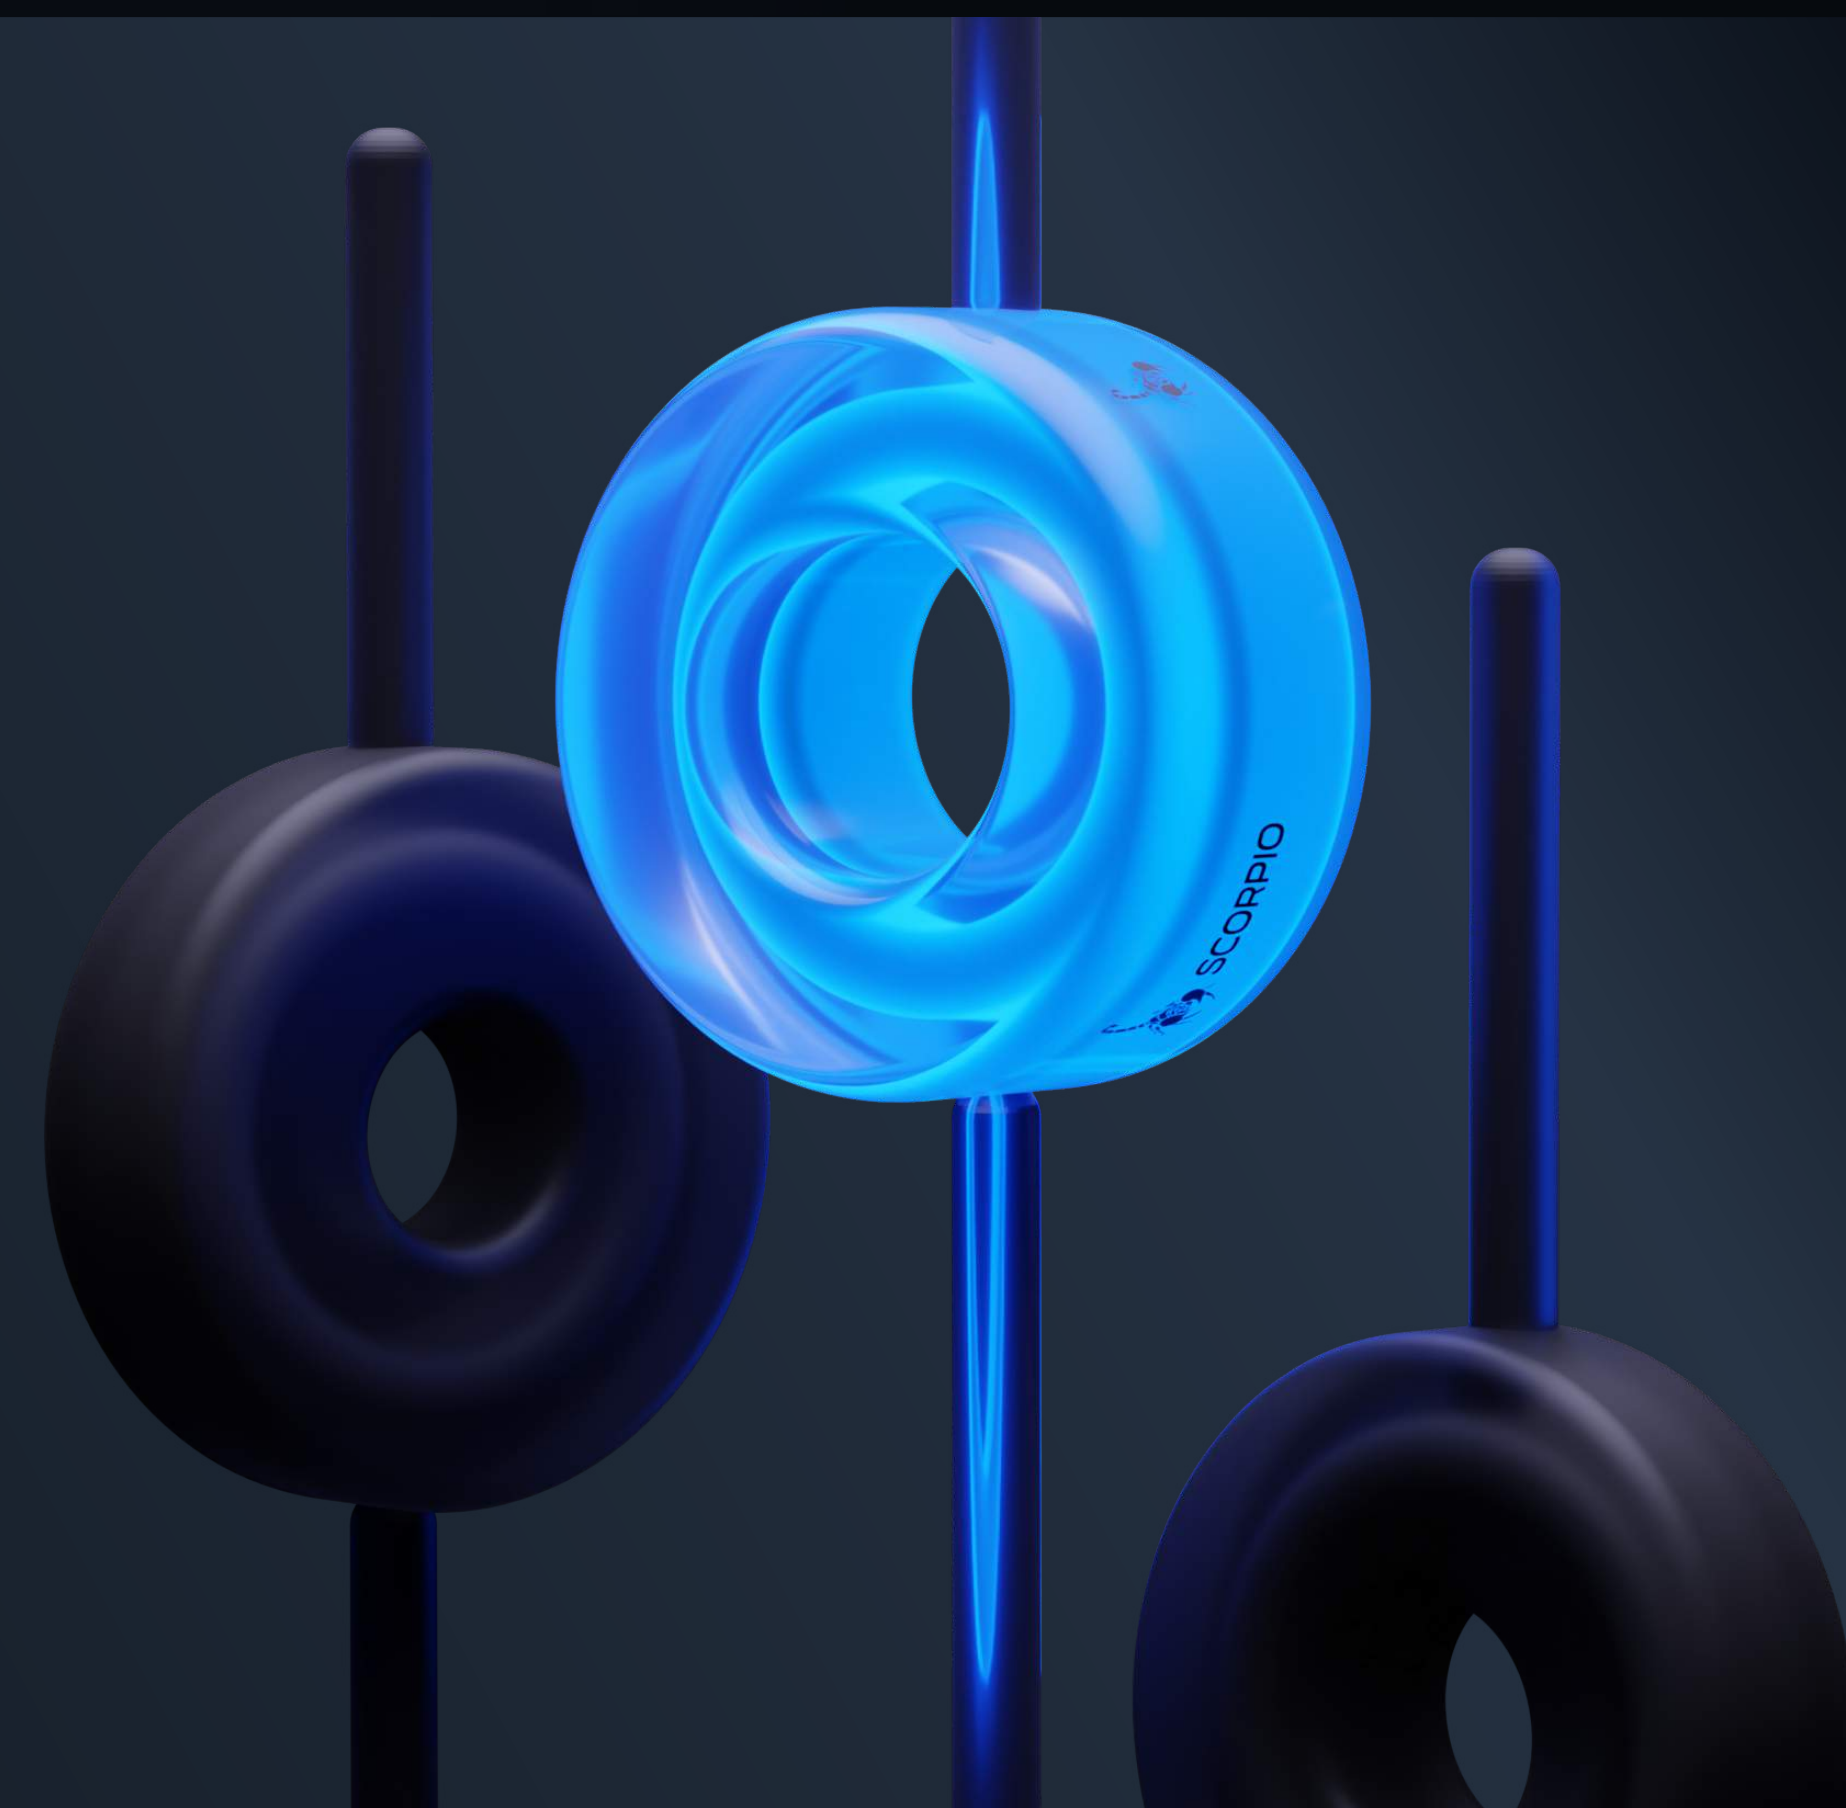

Cross-chain exchange with minimal fees. Transaction is processed in a fraction of seconds, for its execution you just need to choose the currency you give and receive and enter the amount.

HOW DO PORTFOLIOS WORK?

Each of our investment portfolios is diversified and not focused on one asset format and is designed to take into account different risks and potential returns, which makes it possible to predict the expected returns. Due to the analytical work of our team, you have the opportunity to find your niche in the world of cryptocurrency industry, regardless of whether you are an experienced investor in cryptocurrencies or just starting your way in this field.

Stocks

We have developed and applied a number of strategies such as quantification, macro strategy trading and private equity fund issuance to the A-share, Hong Kong and US equity markets, thereby ensuring stable portfolio returns

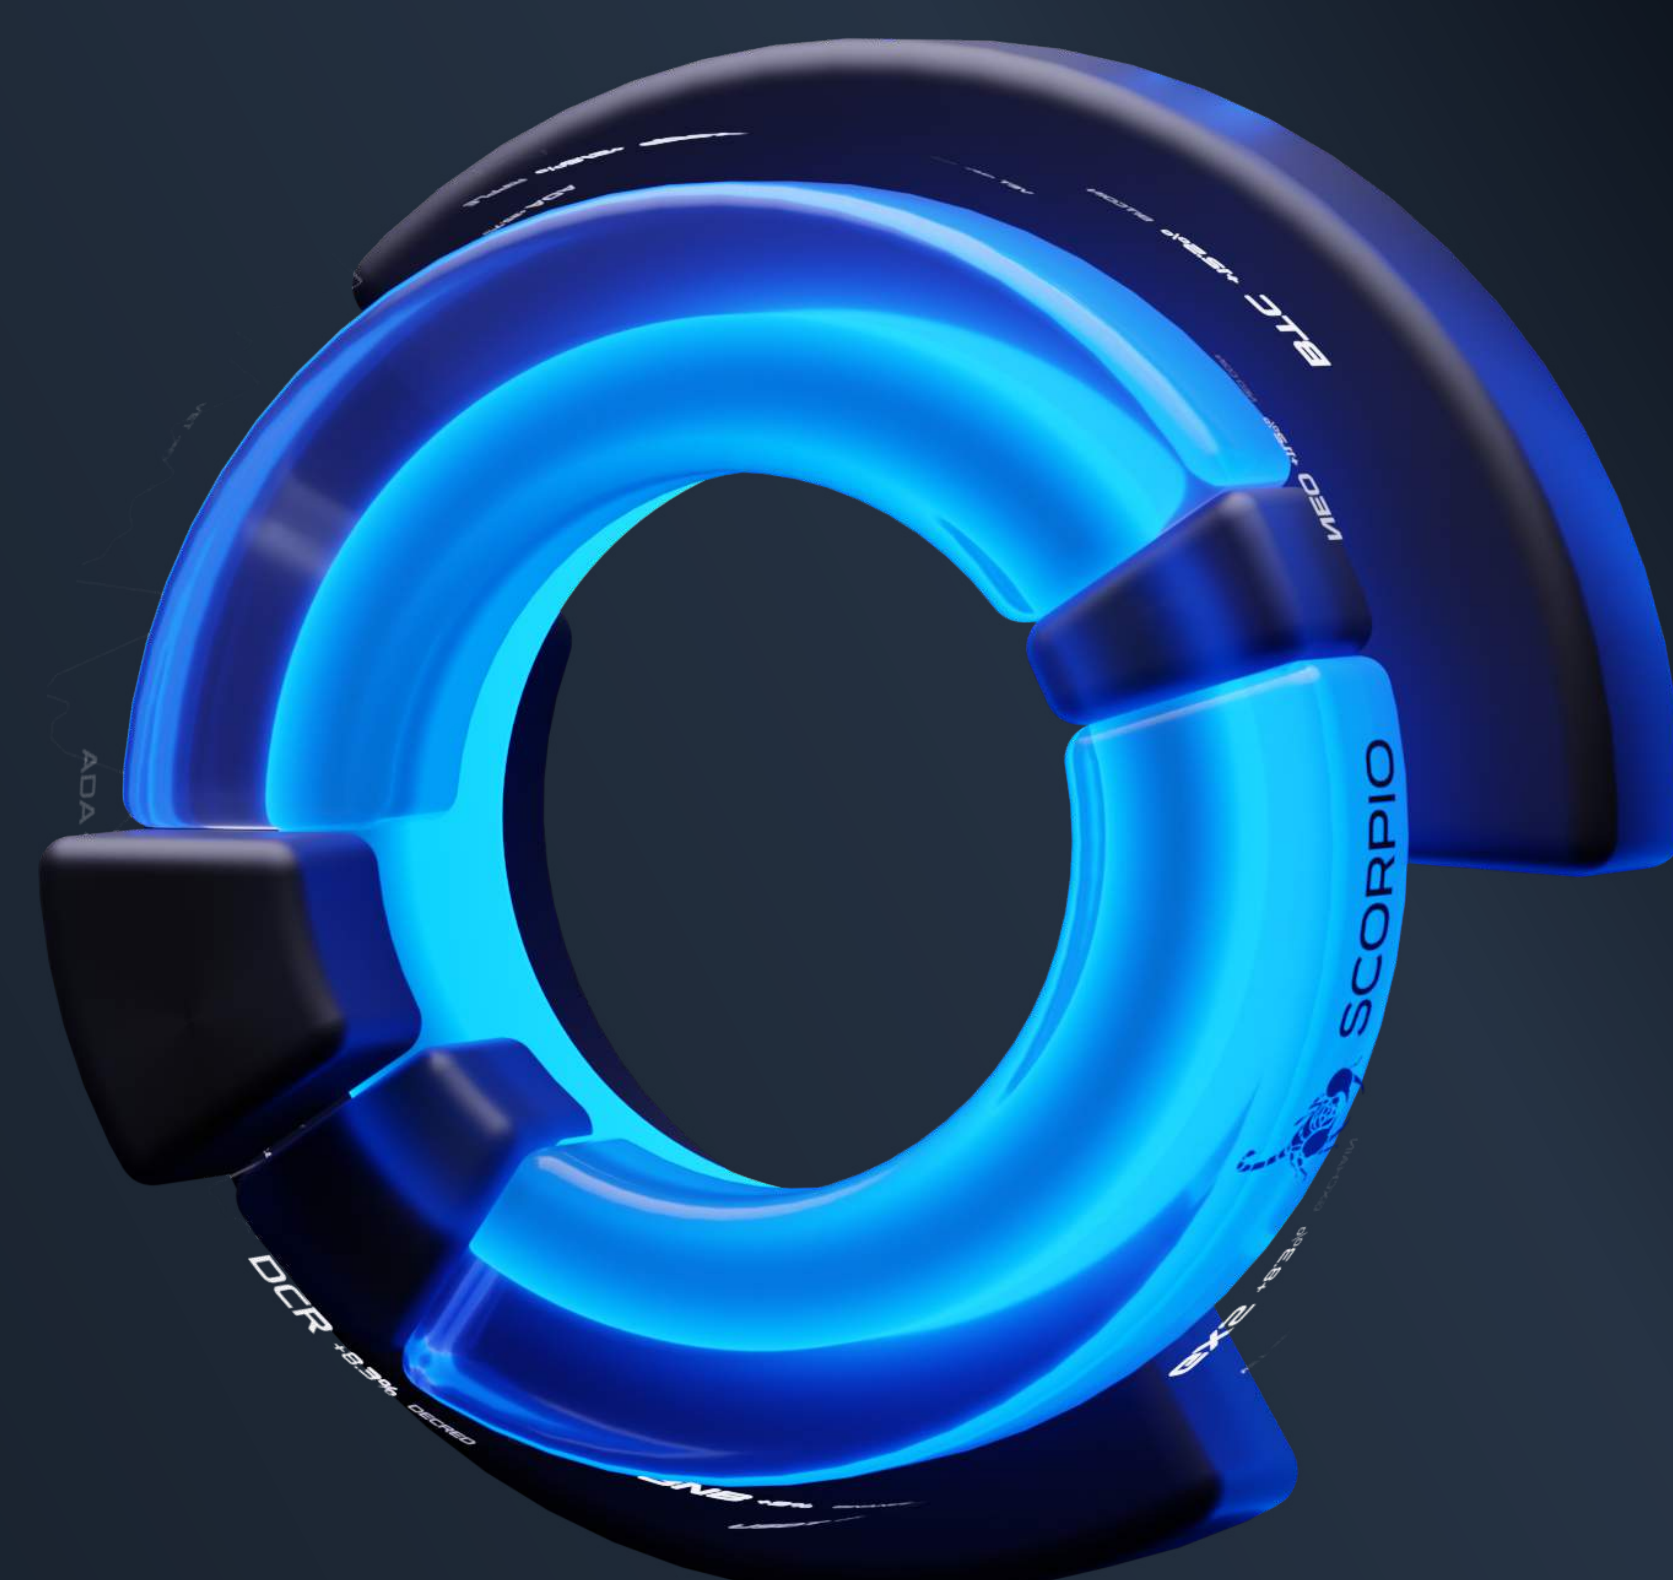

Blockchain

We invest in technologies developing the WEB 3.0 concept such as DeFi, NFT, AI and various cryptocurrency protocols. We support the expansion of supernode networks to increase blockchain capabilities

Venture

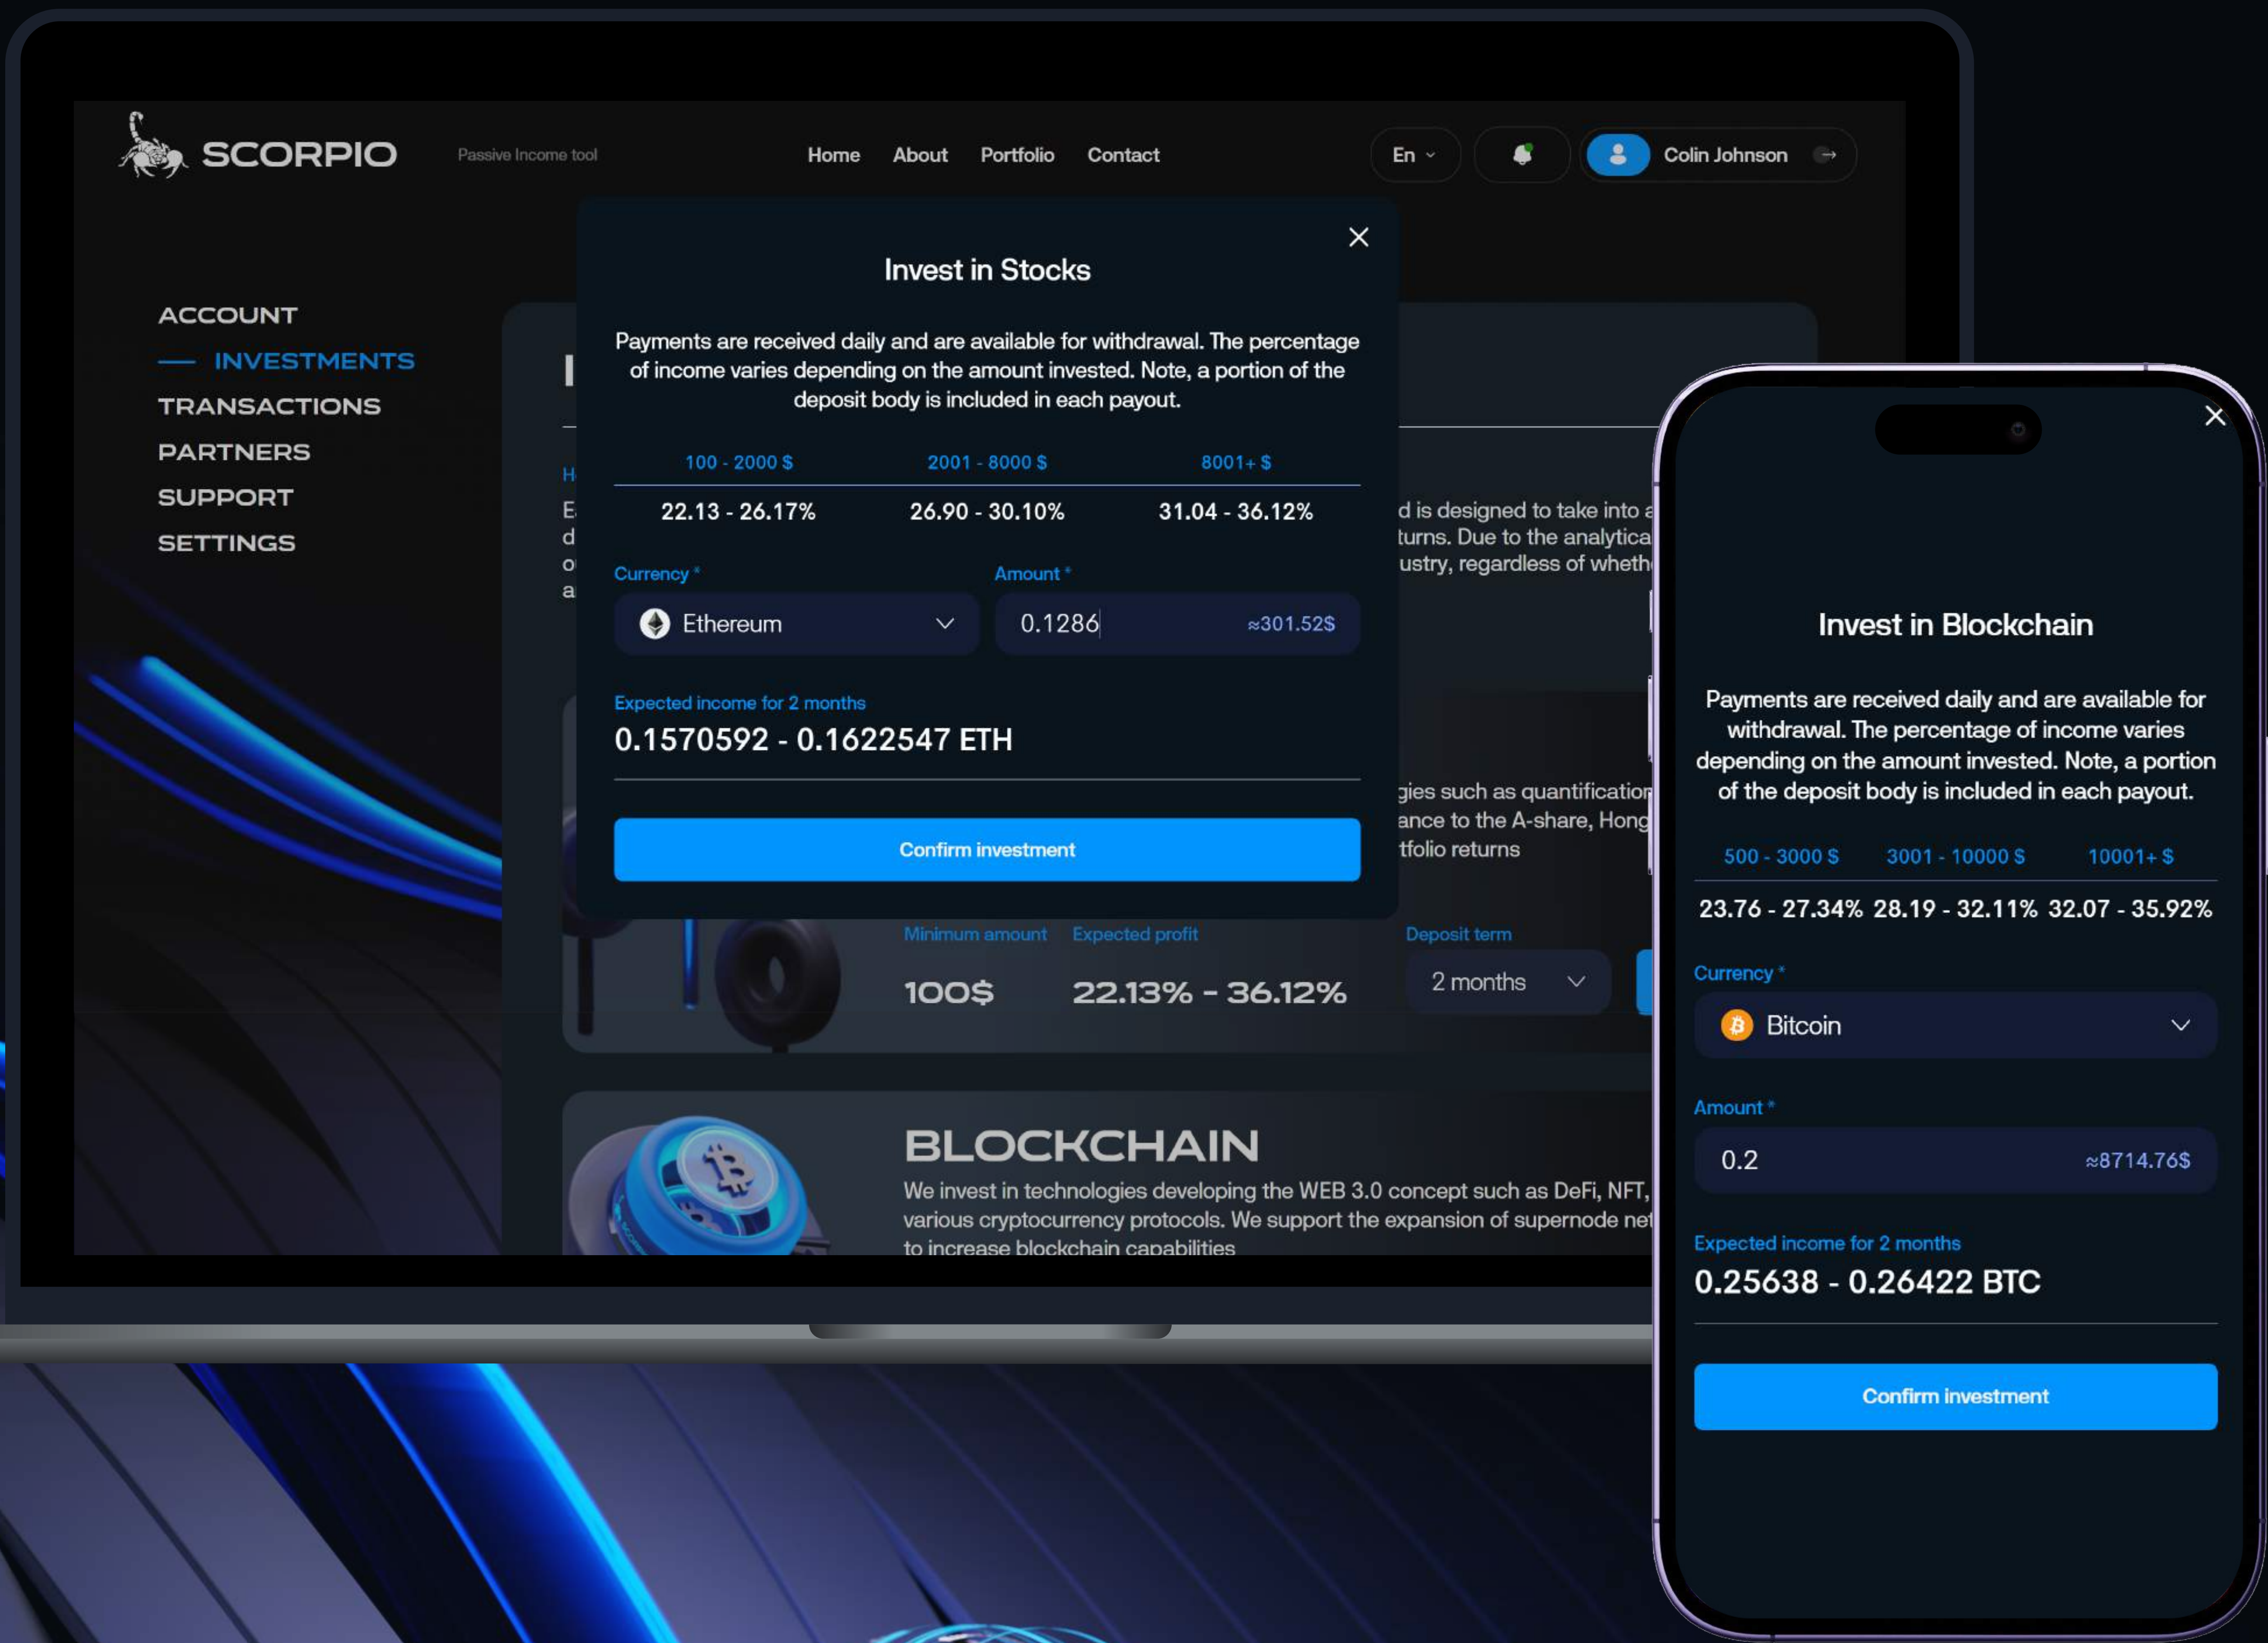

Venture capital investments regularly show positive results as well as super profit potential and we strive to maximize the potential of our partners by helping them in all aspects of their business

HOW TO INVEST?

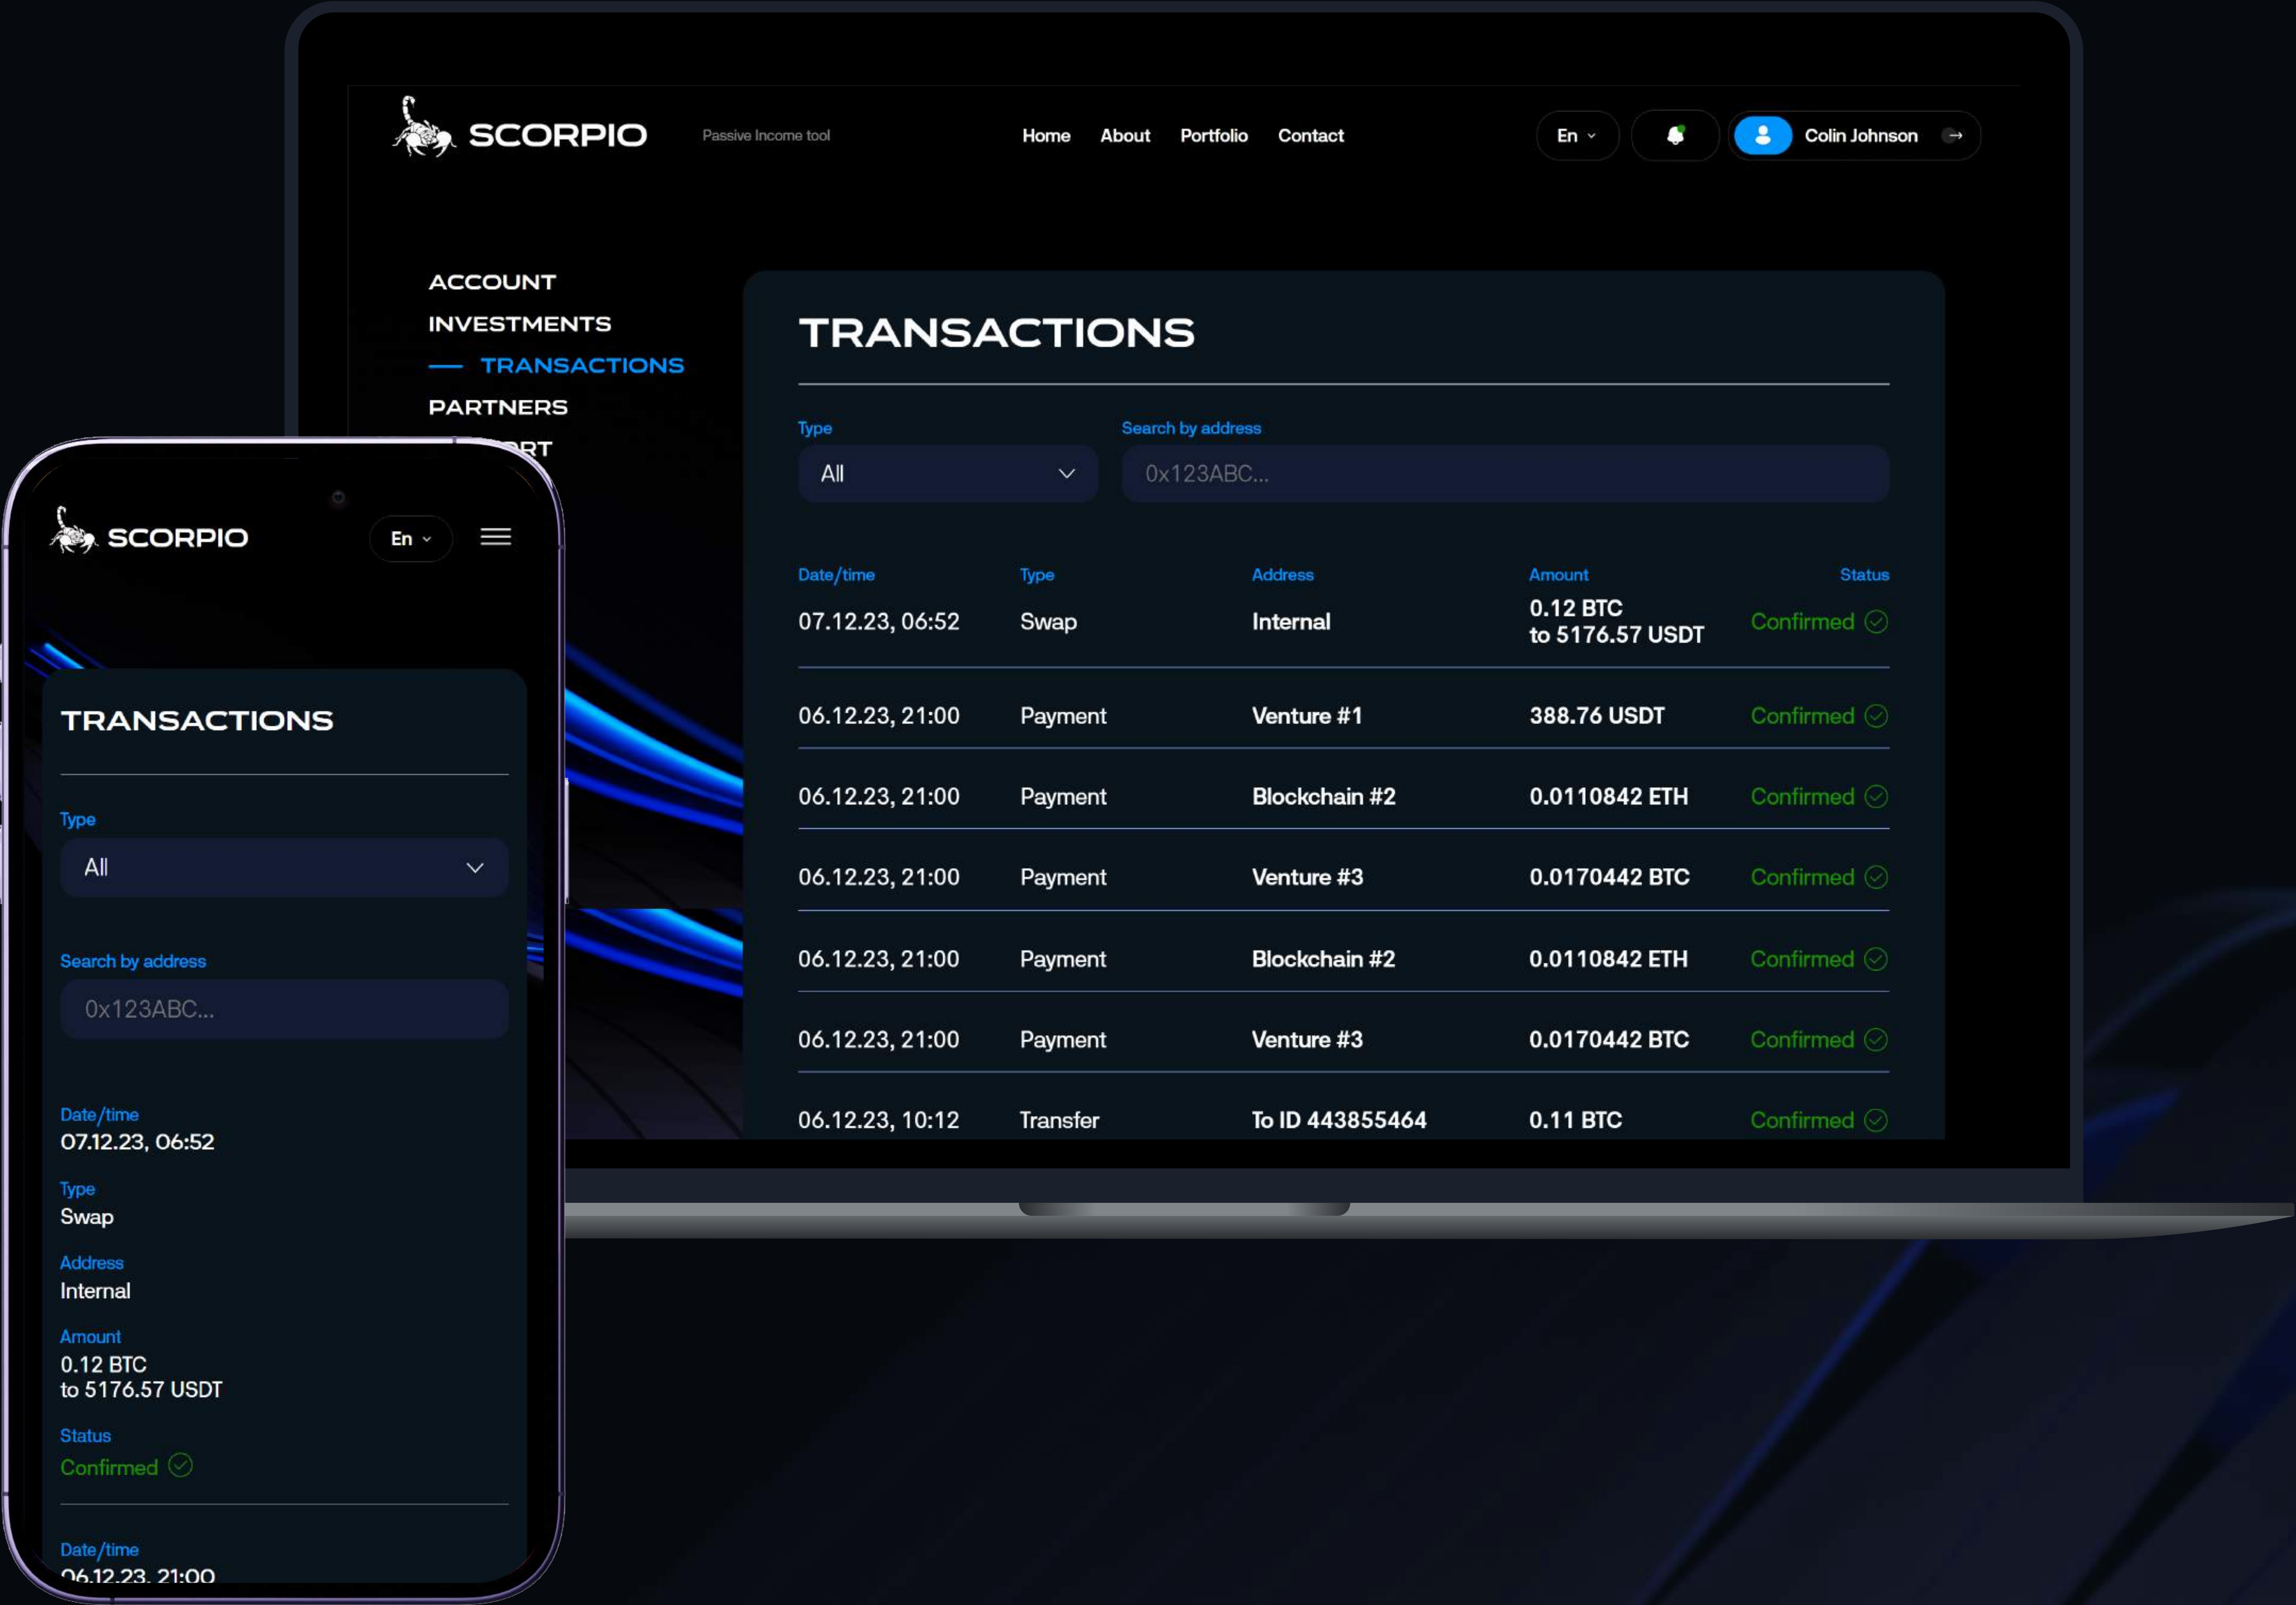

There are 3 investment portfolios to choose from, each of which has a set of its own unique parameters such as minimum deposit amount, term and income growth from the amount. To invest, you need to select a portfolio, a term, and in the popup that opens, select the currency and enter the amount.

Then the investment will be displayed in your dashboard and dividends will be accrued every day.

TRANSACTIONS

This page will display all transactions in your account. You can use the filter to view transactions of a specific type. Also, if you want to find a specific transaction, use the search field by address.

PARTNERS

Develop your structure to get customized referral program terms. Keep track of your referrals' actions in the partner table.

How much can i get?

1 line	2 line	3 line	4 line	5 line
7%	4%	3%	2%	1%

Earn for structure turnover

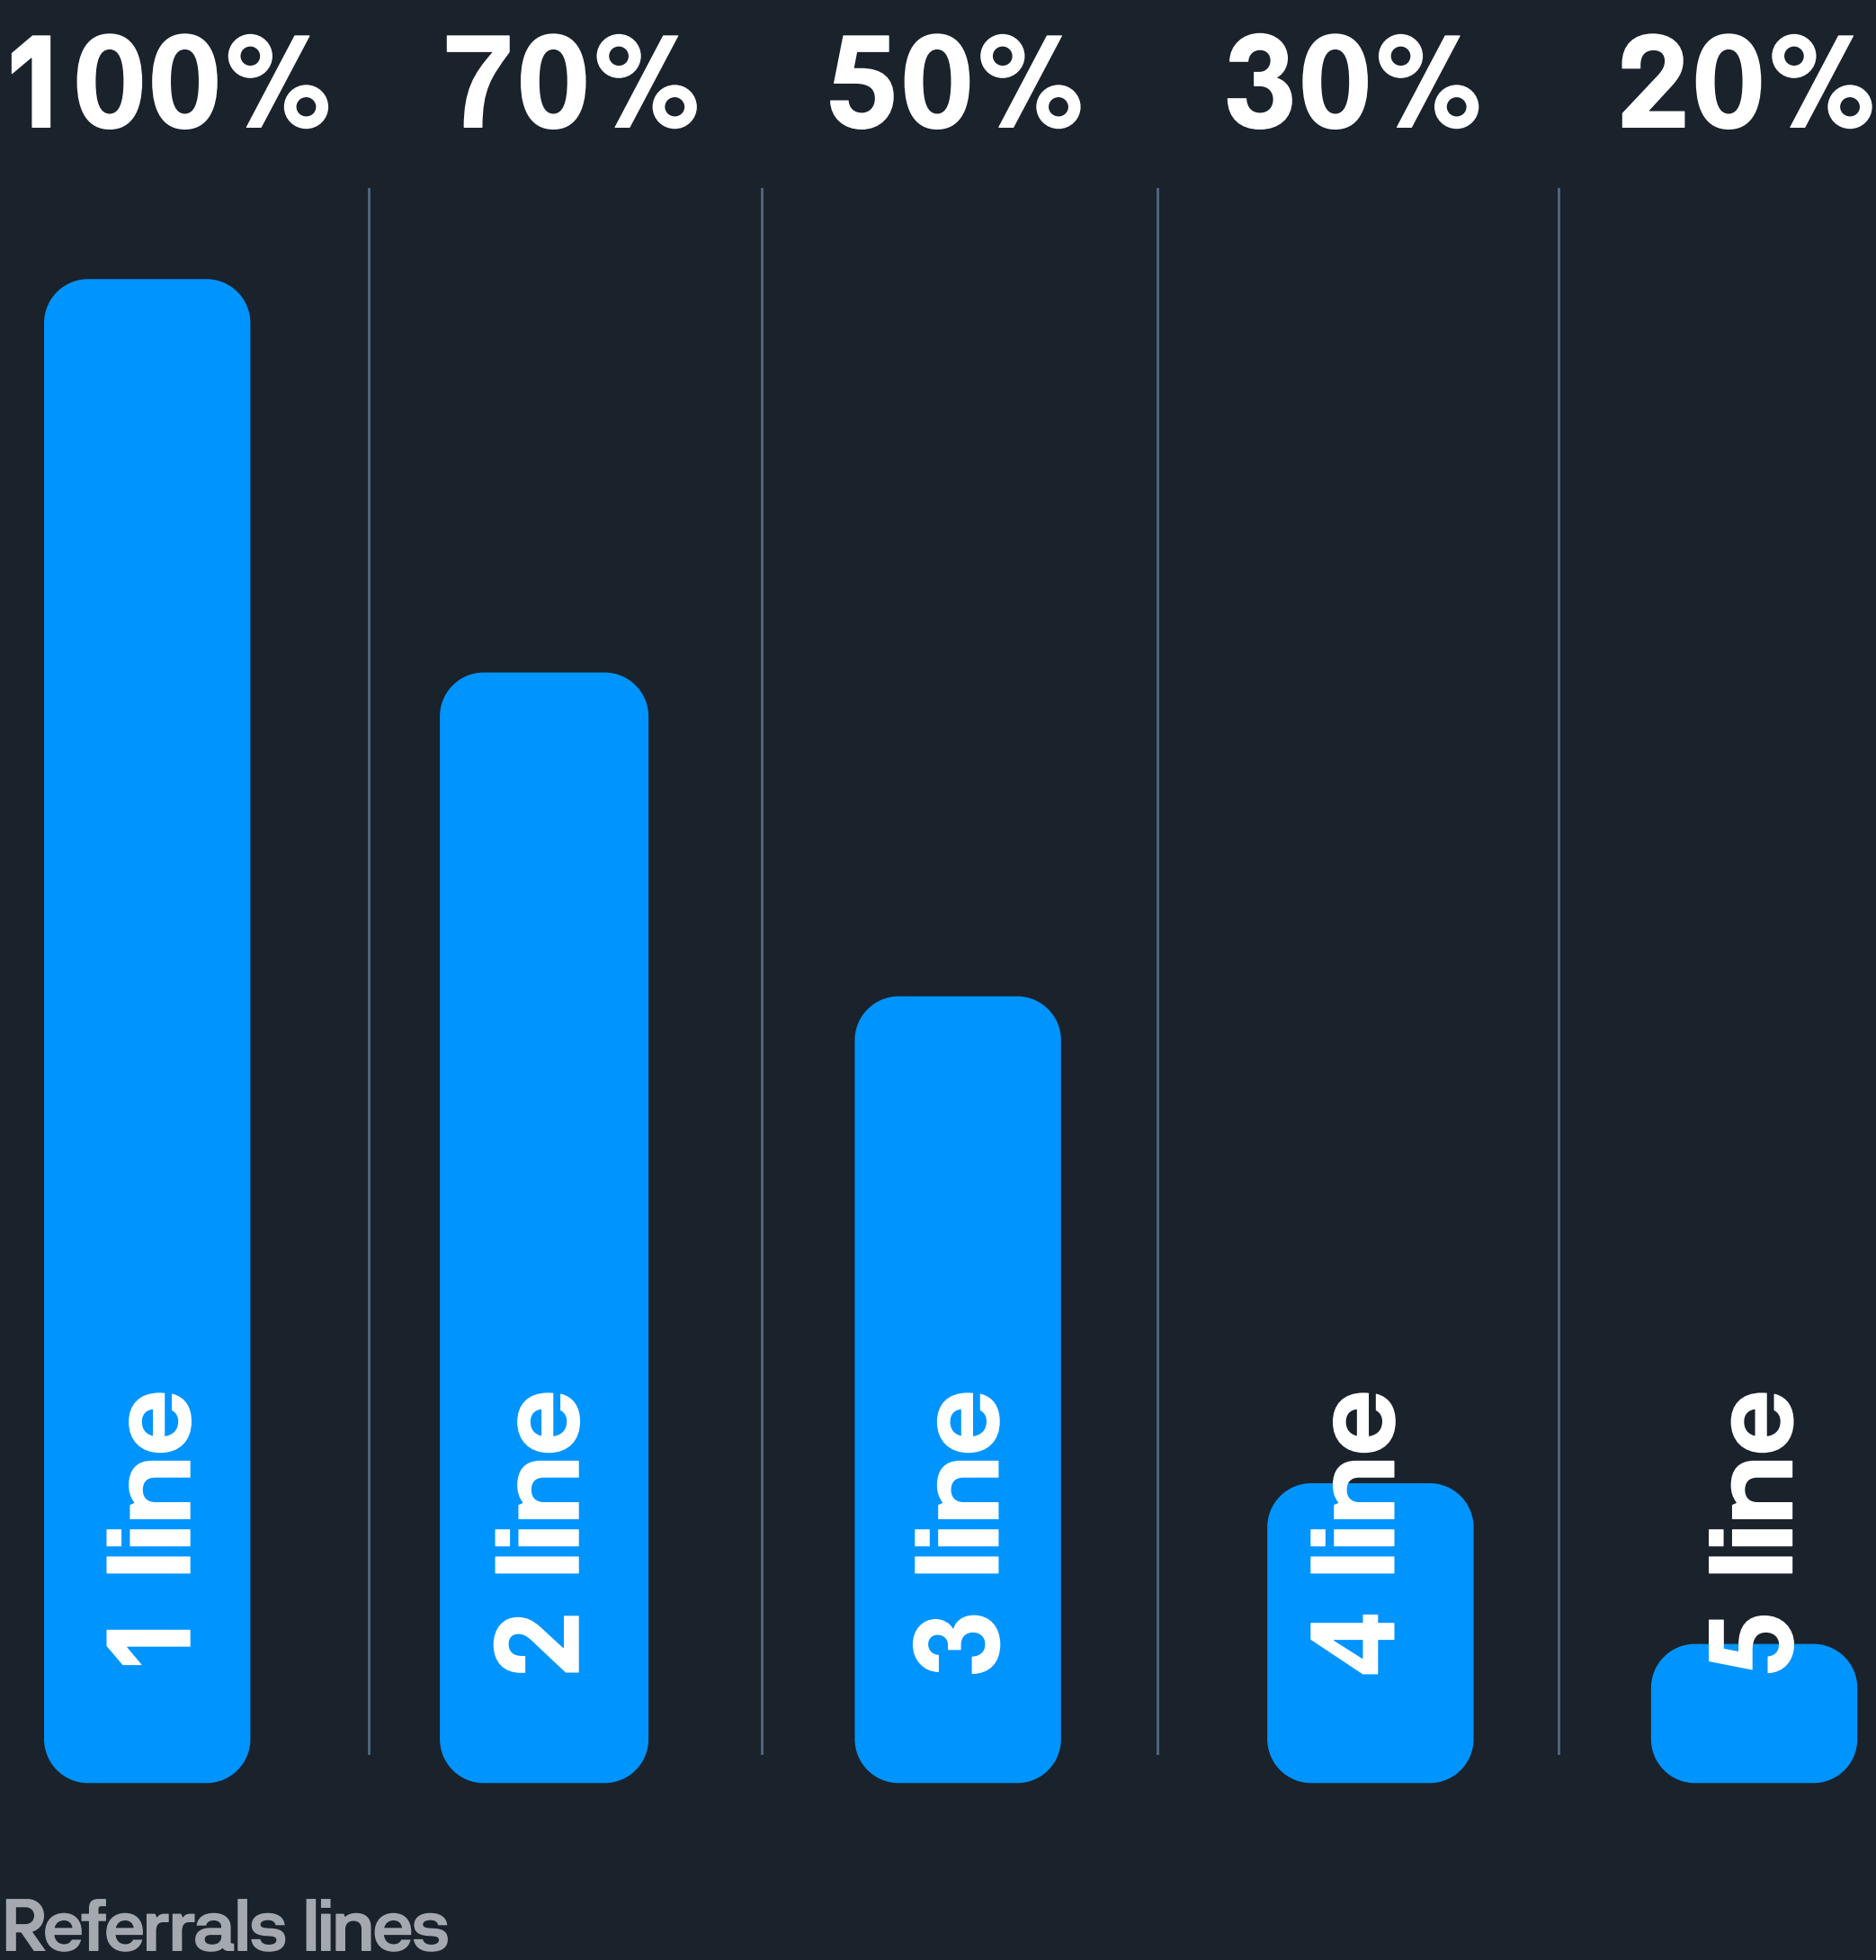

Get bonuses for the investment turnover of your referral structure. In calculating the current turnover amount, coefficients are applied depending on the line of your referral.

How much can i get?

Turnover	Bonus
1000	50
5000	100
10000	200
20000	500
50000	1000
100000	2500

How is turnover calculated?

Turnover ratio depending on the referral line

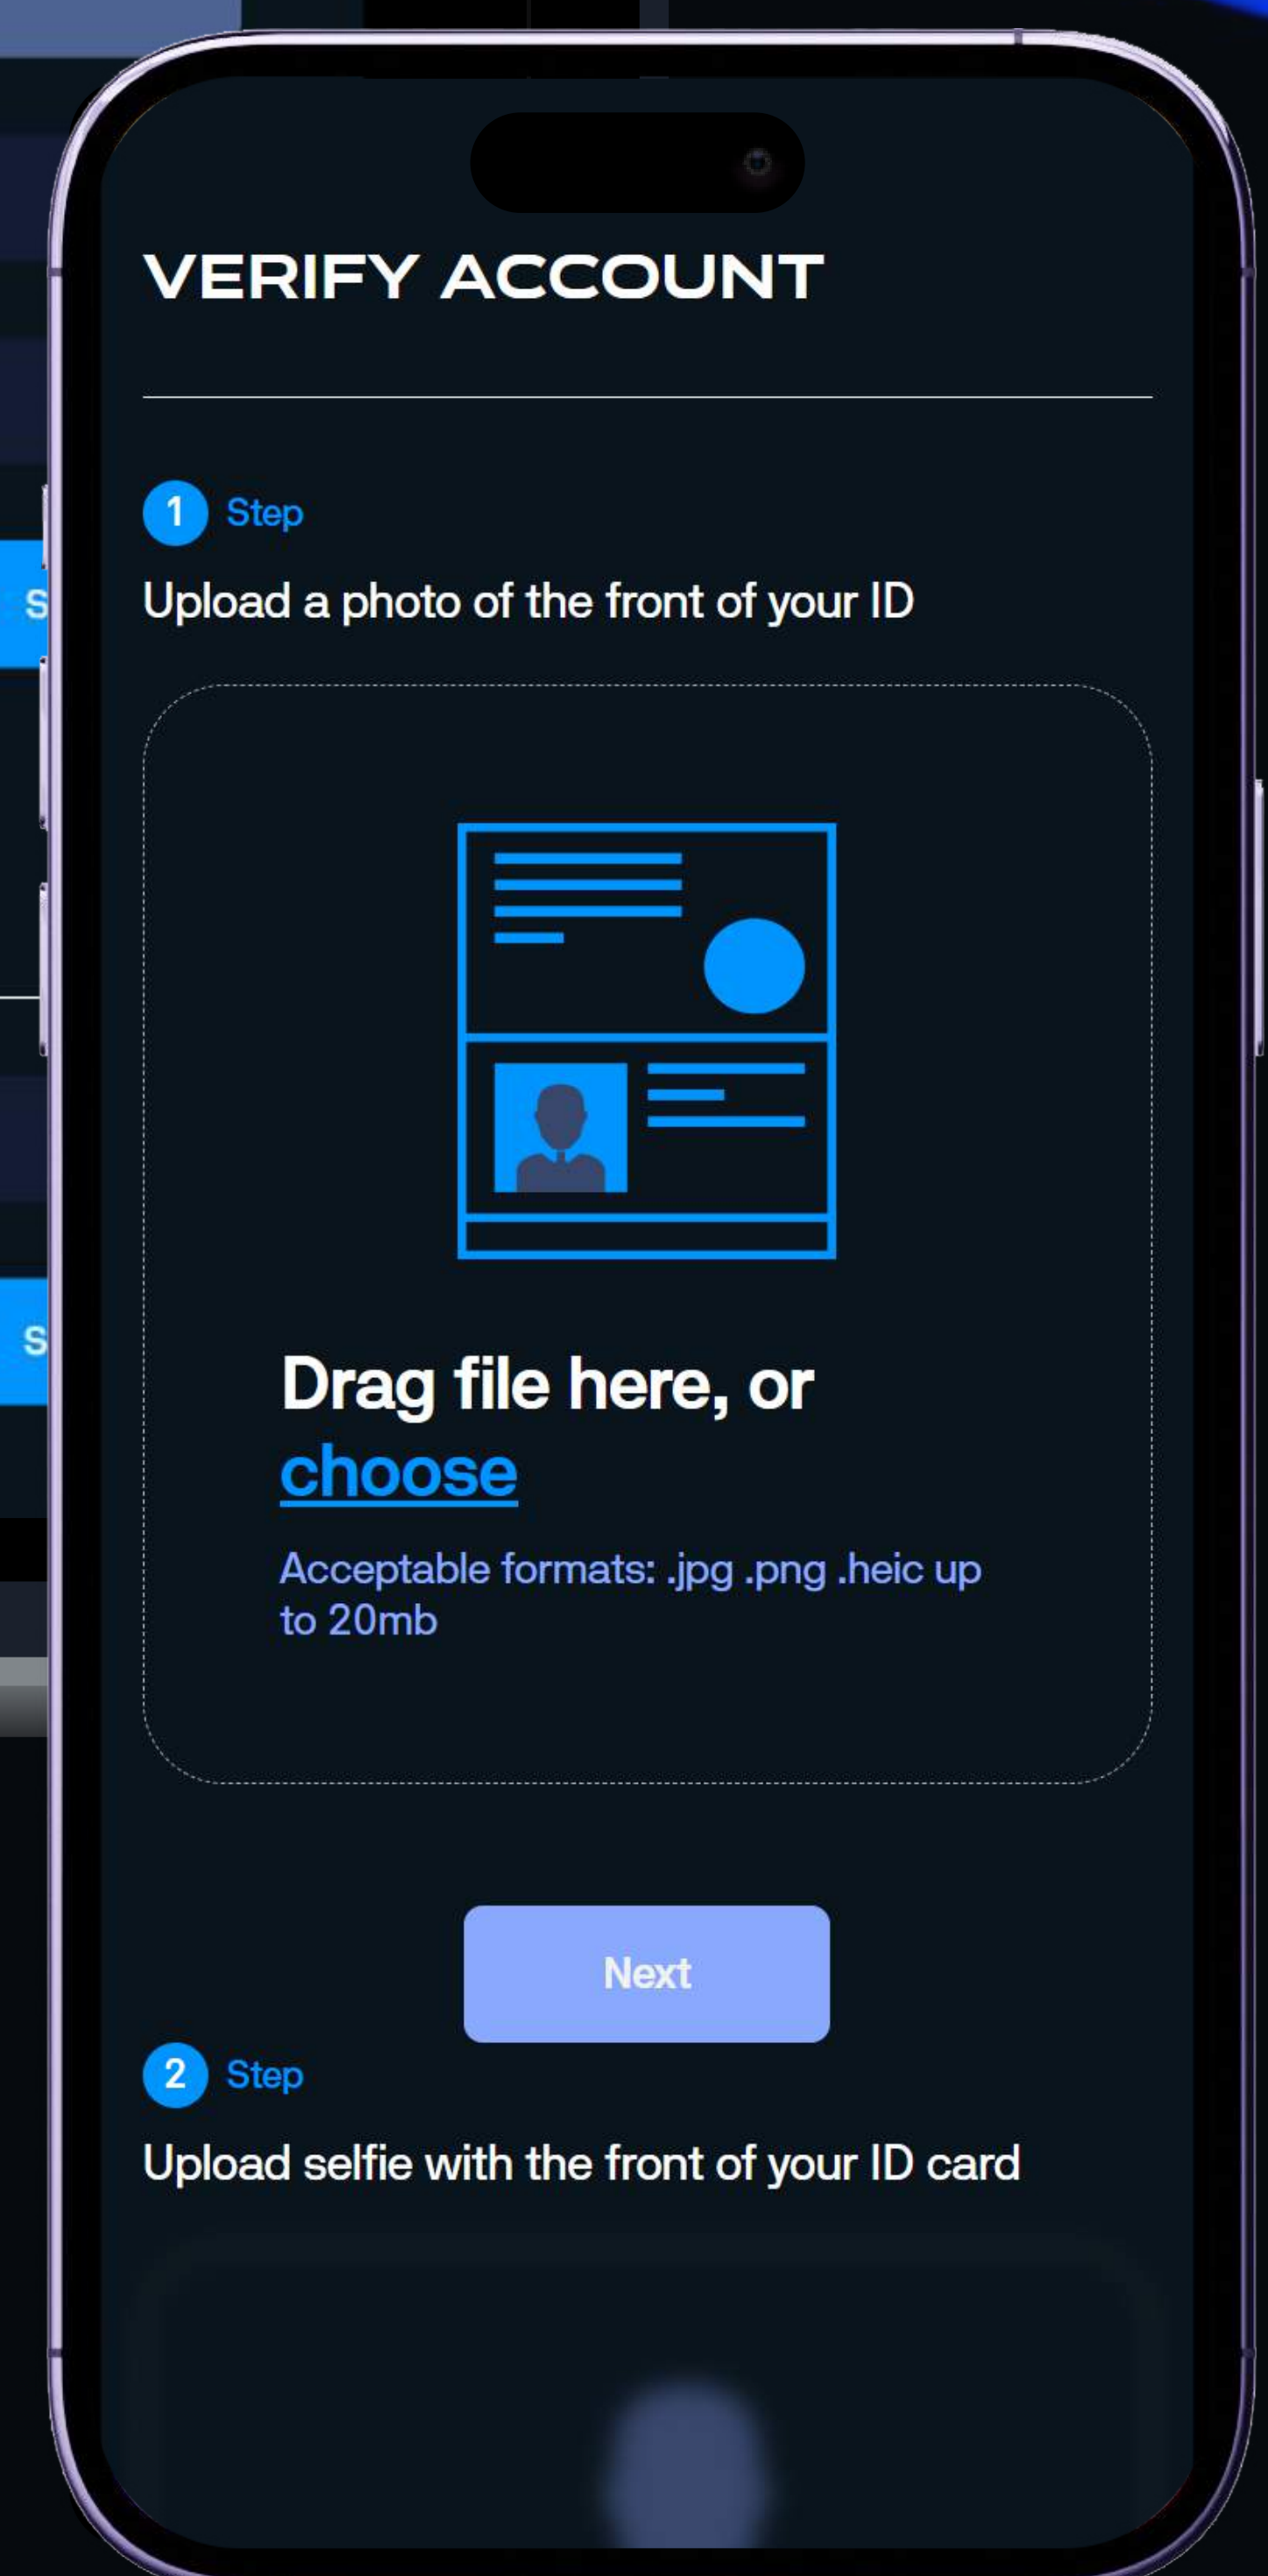

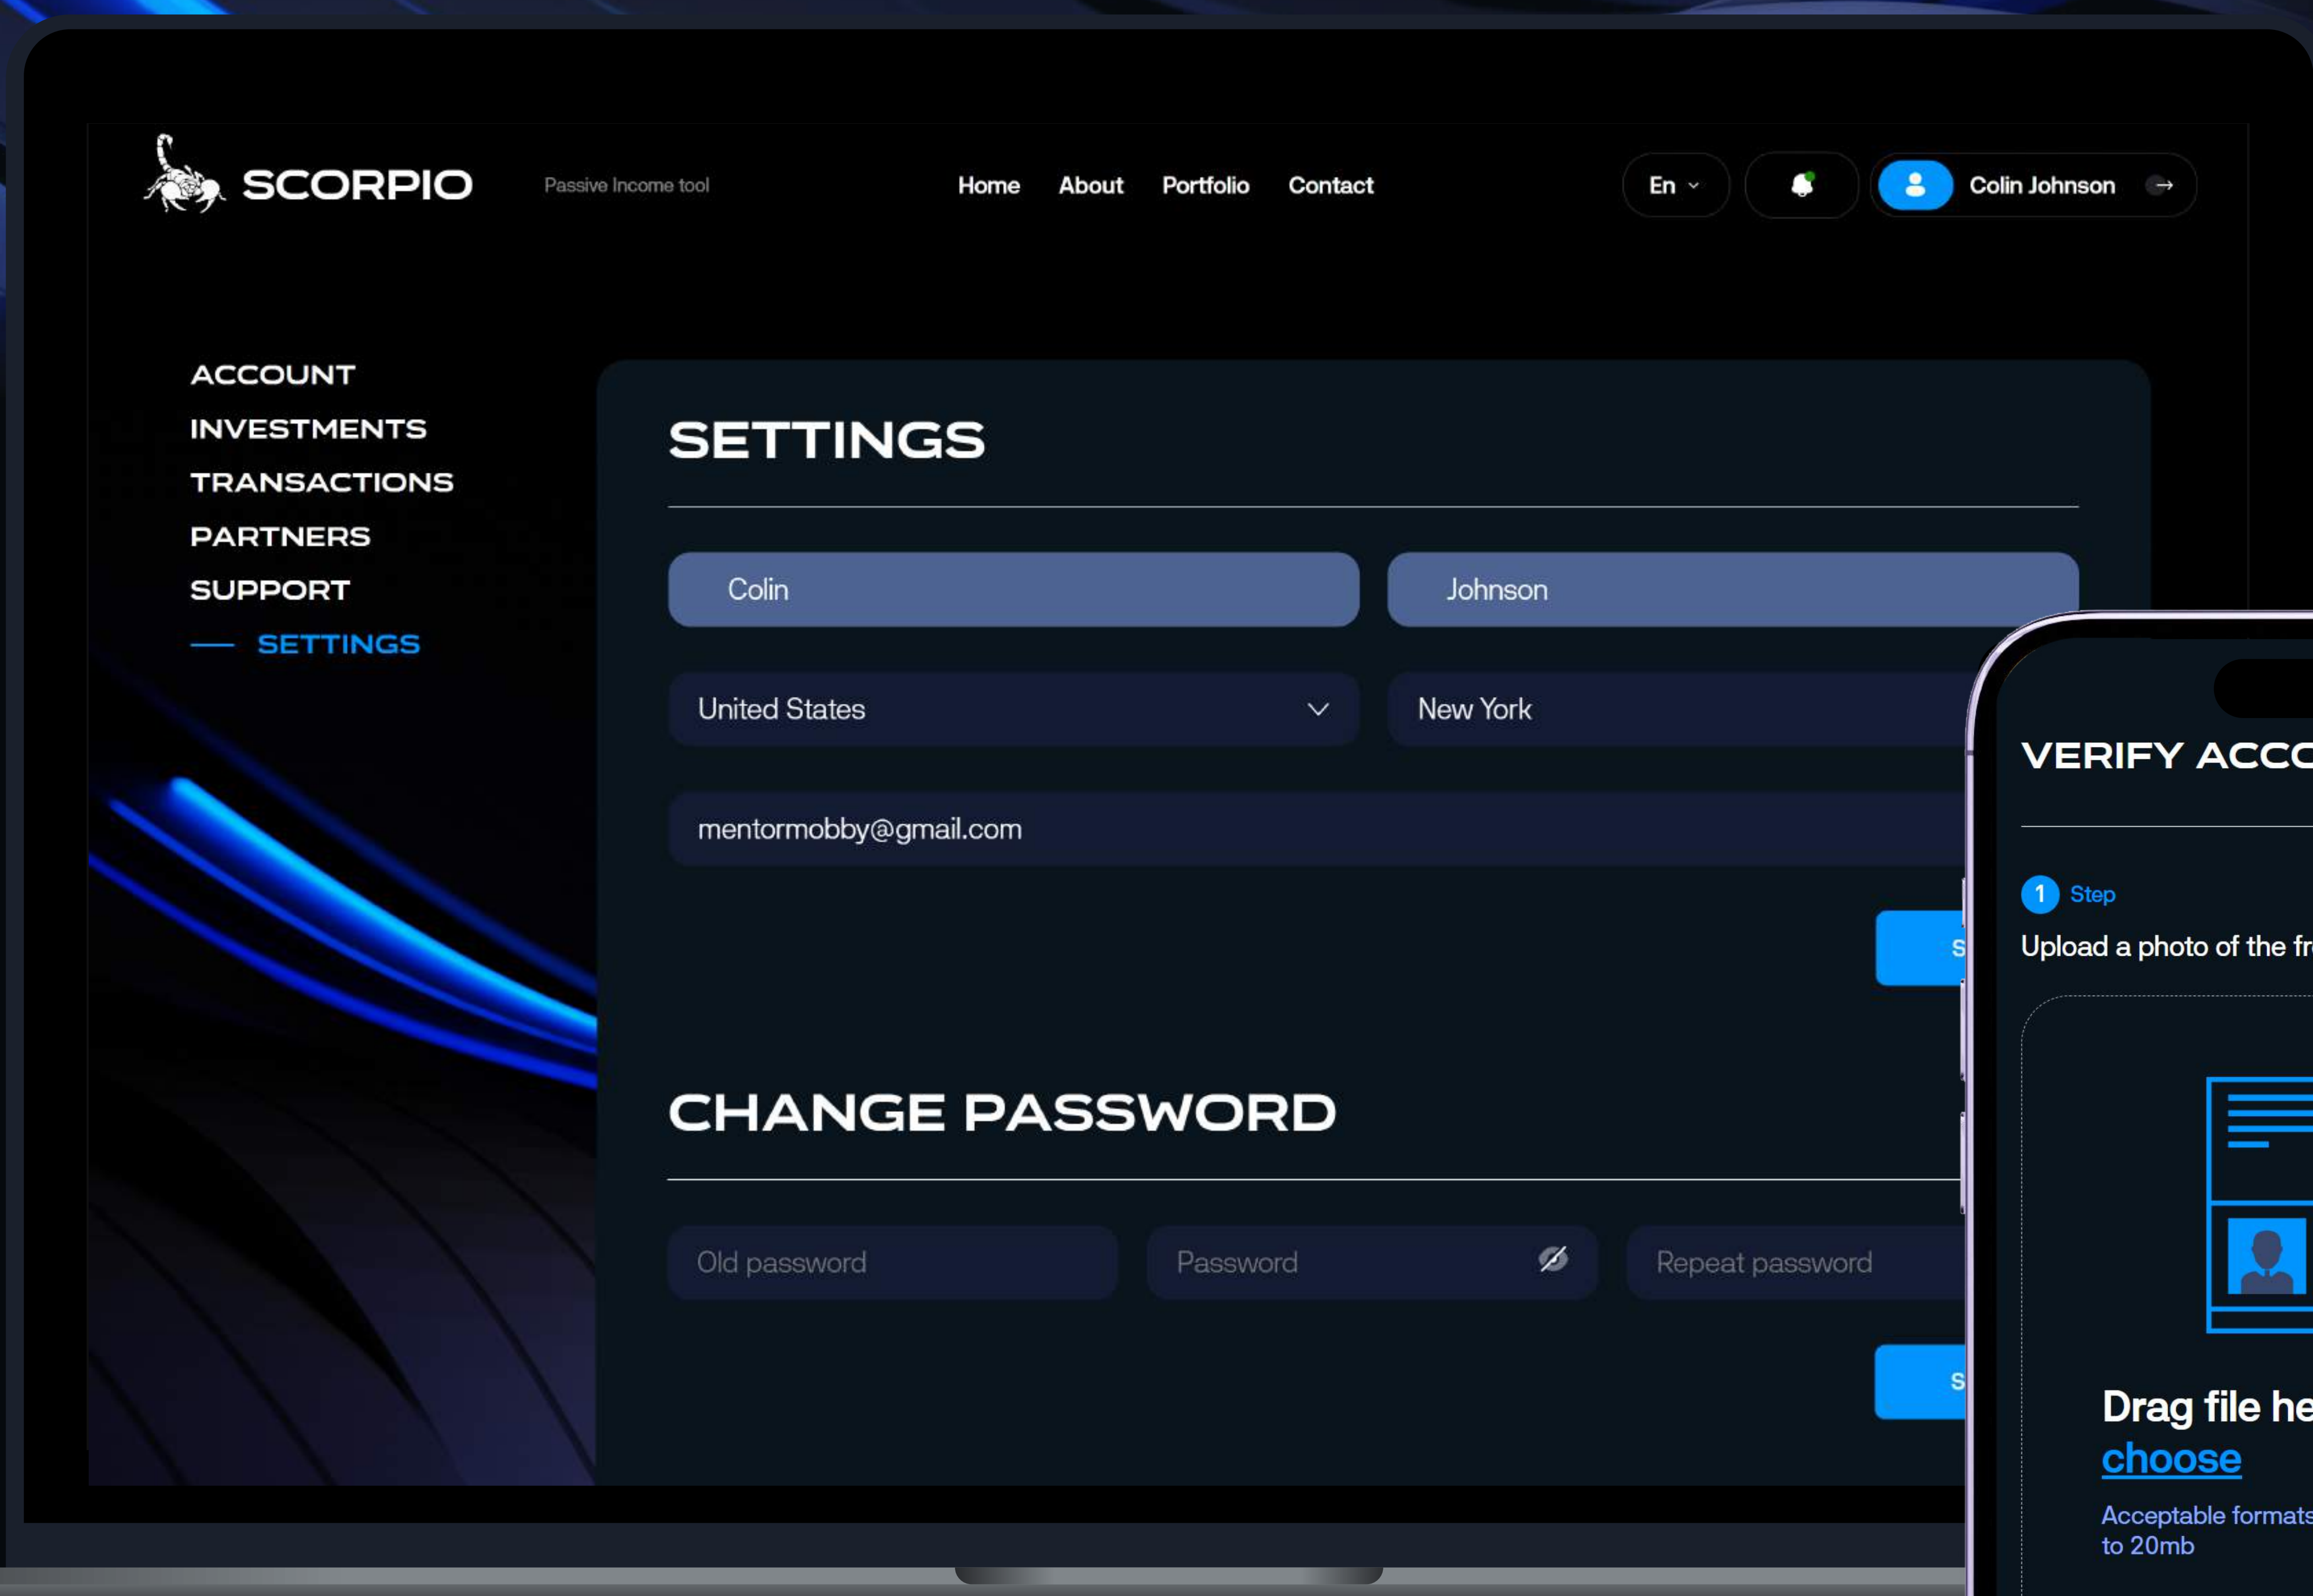

SETTINGS

In the settings, you can change personal details, verify and enable 2fa authentication.

Verification request processing takes up to 1 working day, the result will be notified to you in a notification.

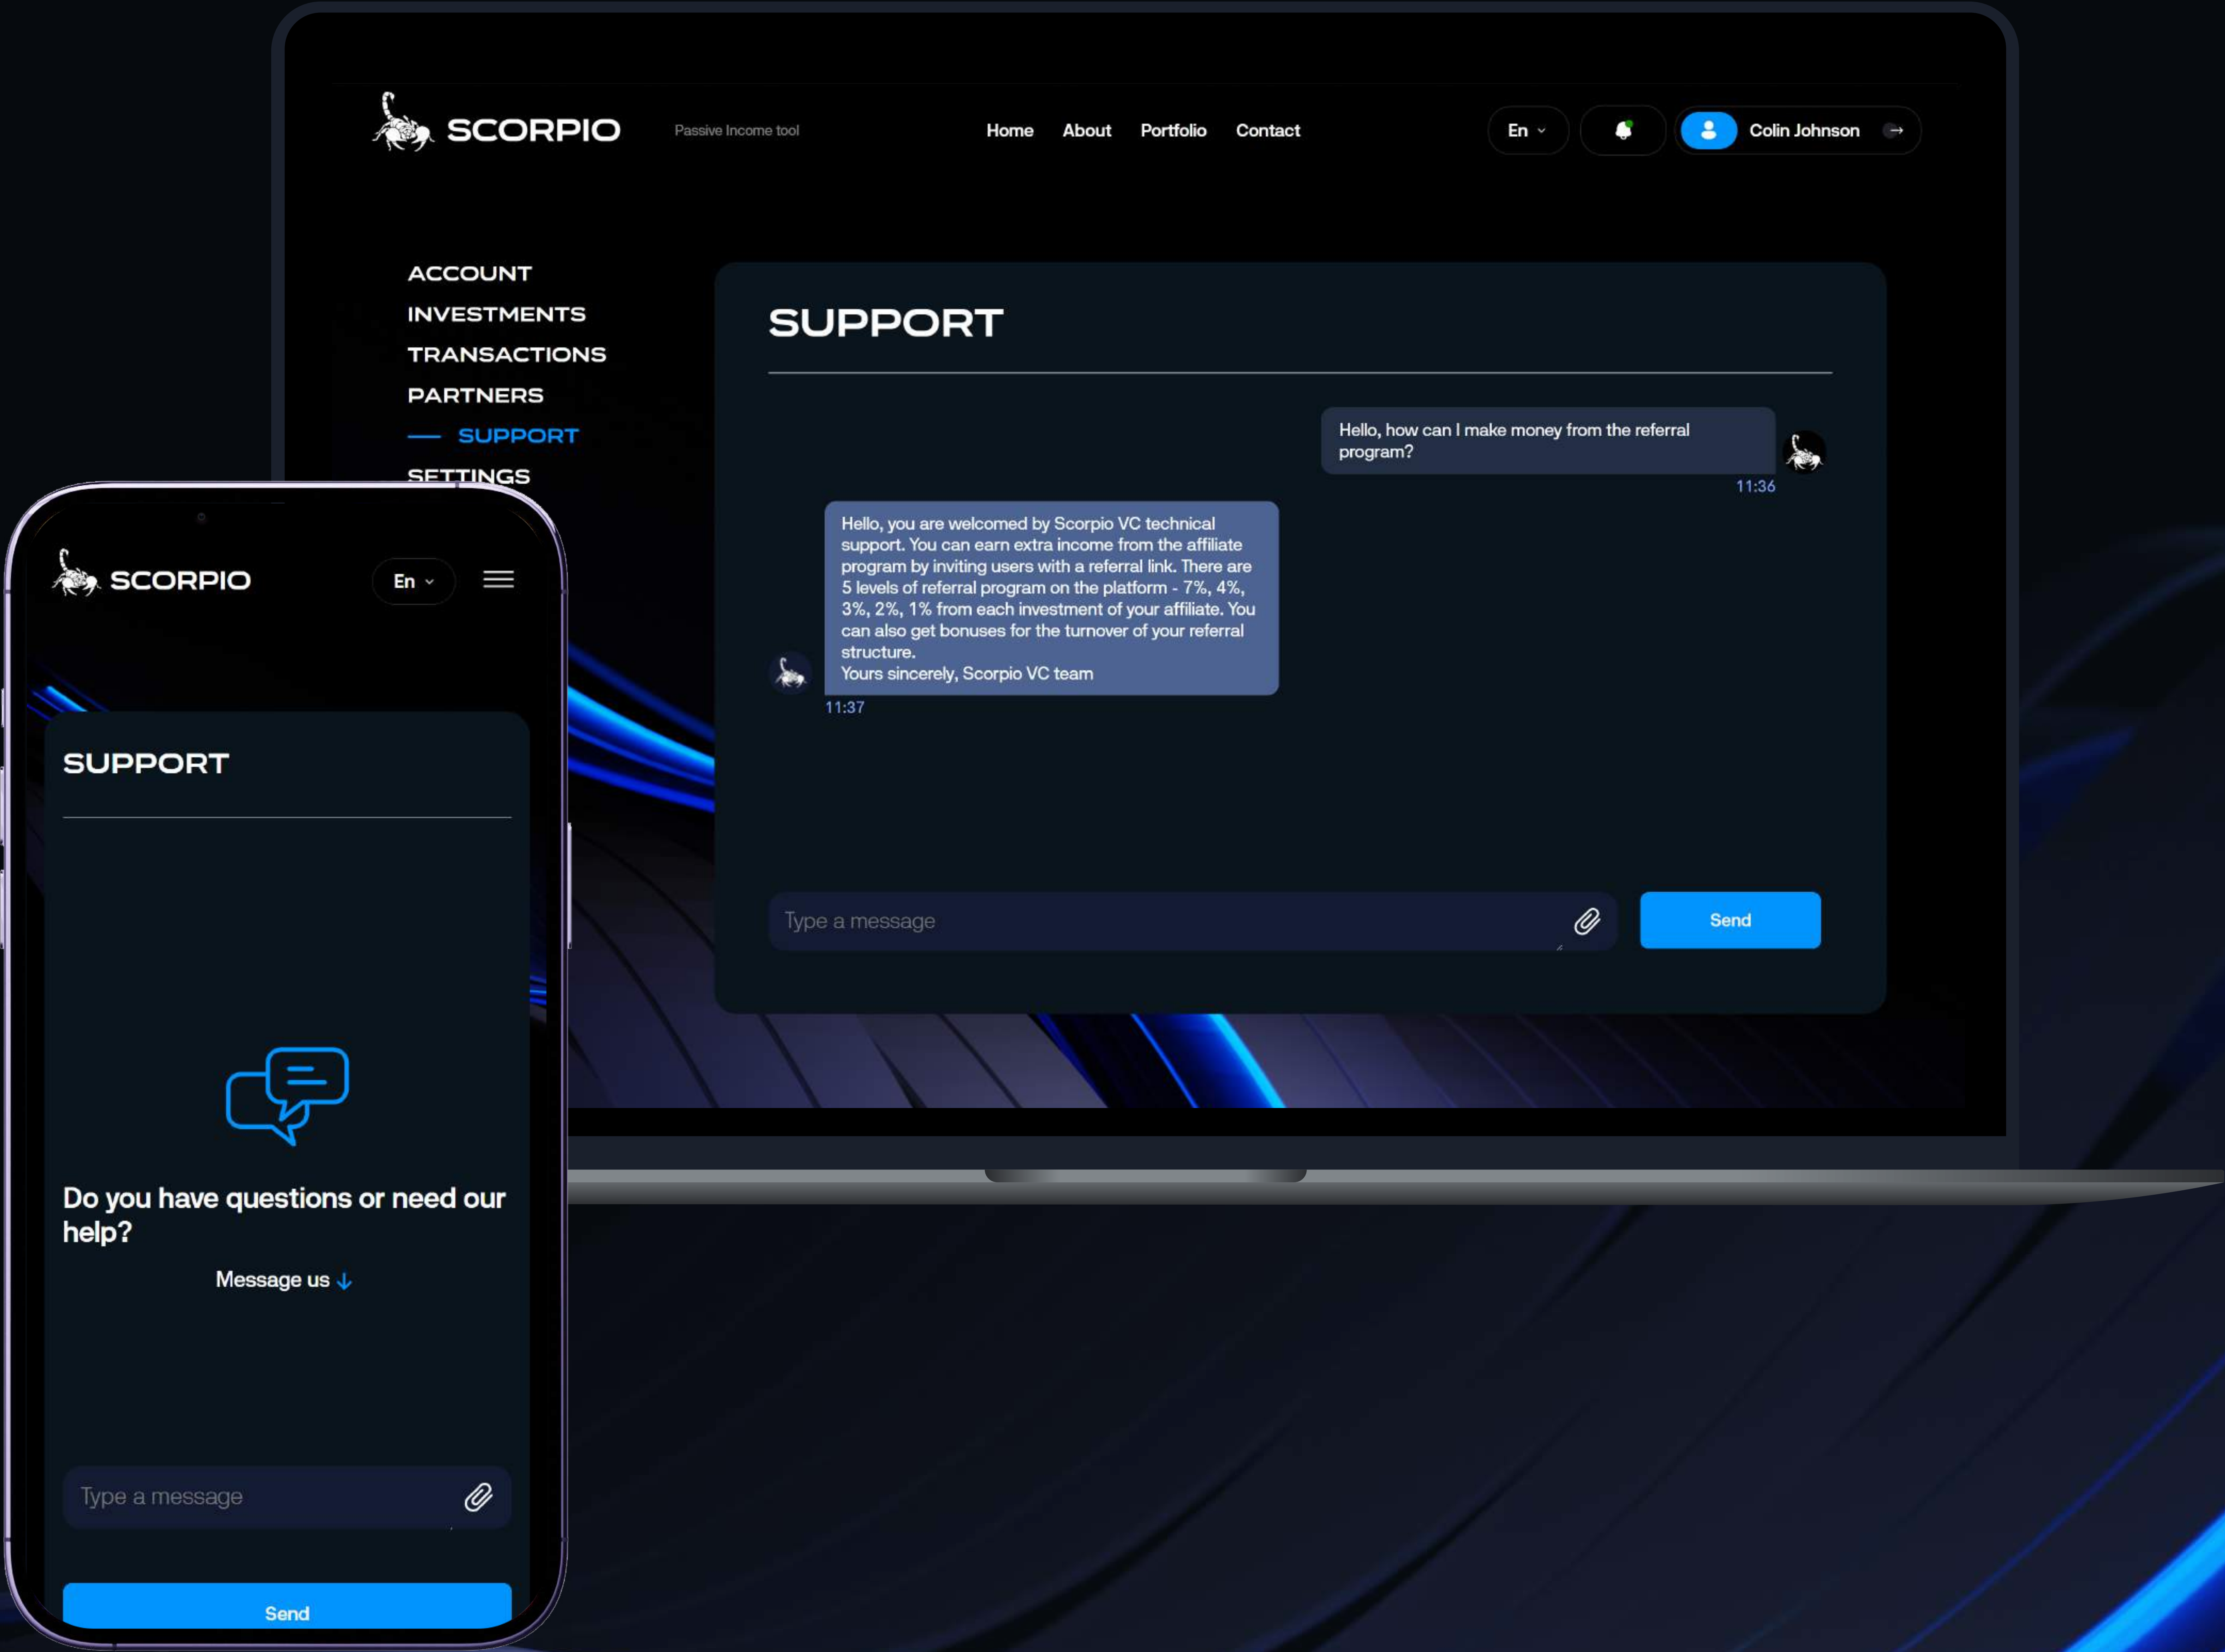

We recommend enabling 2fa through the app to fully secure your account from malicious users.

SUPPORT

If you have any questions regarding the platform, its functionality and so on, feel free to contact technical support during business hours.
